Investigator: V. Godic (UFO Research)

Witness was passenger in a semi-trailer on Route 1 enroute Perth and awoke to observe a brightly-lit egg-shaped object on the ground to the left of the road. Walking toward an open door was a normal-sized figure of human appearance; a second "occupant" was seen seated within the object, through a squarish window, looking upwards at something in the vehicle. As the truck passed, the light rapidly faded until, by the time she got the driver to stop, only a single white light was visible. She said she had been awakened by a "voice" just prior to her observation.

Witness, who arose from bed to go to bathroom, glanced out a window and clearly saw three "little men" outside of her house. They were 80-90 cm tall and were dressed in white outfits like monks' habits, with tight belt about their waists; on their heads they wore cowls with two points that hung to the shoulders. They seemed to be looking for something on the ground by the walkway between her house and a nearby school. One of the little men looked towards the house and apparently saw the witness "with my nose against the window" for he appeared startled and said something to the other two, unheard by the witness; all three turned at once and moved off quickly "with very small fast steps." Going to another window in the house to see if she could see more, the witness discovered a glowing red, spherical object of 2 or 2.5 meters in diameter at a distance from the house of 35 or 40 meters. She went to wake up her husband and when they looked for it the object had disappeared.

Investigator: Jean Desbois (LDLN)

While enroute to work, witness's motorcycle misfired and stopped as a dazzling bright light appeared on the road ahead. As he approached, he saw it was a luminous ovoid object, with smoke underneath, hovering just above the ground. A "man" suddenly appeared and came up to the witness, putting his left hand on the witness's shoulder and offering "reassuring words." The man was

about 2 meters tall and thin, wearing a uniform similar to aluminum foil; a large helmet rested on his shoulders with a snorkel-like tube on the right side. His face was "like a human face covered with a nylon stocking," with slitted eyes. He carried something like a pistol in his right hand, pointed at the ground. He asked the witness where he was going; he replied, "To my job." The Ufonaut then said he must return to the "object," and told the witness not to inspect it too closely. He entered it from beneath, and it rose vertically, with a sound like a swarm of bees, and then moved off horizontally. The motorcycle then started normally.

	Investigator: Wido Hoville (APRO)			

Shortly after midnight, witnesses saw bright lights on their property; later in morning, they observed a dome-like "tent" about a third of a mile away; a second, smaller object emerged from it and moved across the ground to a distance of ab 200 ft; five figures of small stature, wearing bright yellow garments and helmets, moved quickly back and forth between the two objects for an undisclosed period. When the witnesses next looked, all had vanished. Ground traces of various descriptions were found at the site.

Witness was awakened sometime after midnight by a brief, high-pitched sound; room lit up with bright orange-red glow and he saw 3 humanoids 4-5 ft tall materialize, with bald heads, wrinkled skin and pointed ears. He passed out and came to on the floor, against the wall, and unable to move. Entities were examining him with an oval object that produced a "skeletal" effect to his legs when it passed over them. He felt severe headaches and passed out again as one of the beings reached towards him. He awakened toward dawn on the bedroom floor, found lights on in bedroom, bedclothes folded neatly back. Reported incident to the Center in June 1974 after a second curious incident involving his girl friend.

	Investigator: George Eberhart (for FSR)			

Upon arriving home, witness saw a "ghost-like" figure floating about 50 ft above the ground at 1000 ft distance; it was about 4 ft tall and thin, "like a person draped in a close-fitting sheet." It was seen only briefly when she noticed a bright white object moving about, and approaching to within 200 ft, before going away. It was about 20 ft in diameter and ab 25-30 ft off the ground.

Later, as she made supper, she saw a "little blue-green thing" about 2.5 ft tall and with a face with "spiky things at the tops and the sides of the head," look in an open door; it had stumpy arms (she saw no legs), and quickly disappeared from sight. UFO sightings occurred about the same time in nearby Athens and elsewhere.

Investigator: Charles Wilhelm				

While out on his farm with his coon dogs, "Sam" came upon a dimly lit object sitting in a field on tripod legs, approx. 300 ft away. The object was saucer-shaped with a dome atop, and about 75-100 ft wide, with two blue and two white lights. Three humanoid figures of roughly normal size were seen moving about the object. The dogs "carried on something fierce" and approached no closer; after almost three minutes, the figures were seen climbing up a ladder under the center of the object, which then took off vertically.

73-57	Type C:	Br, 1 Obj, 1 Ent		
Investigator: Unknown				

Police observers on Caddell Mountain fire tower observed for 2 hrs "red & yellow flashing lights moving over mountain and also up & down" and described a UFO that "came very close to ground at times." During this, Terra Alta policeman Willard Zinn, on his way back to Terra Alta, was surprised by seeing a four-foot "creature" run in front of his car. Abruptly slowing, he put his car "in the ditch" and had to be towed out.

Investigator: Ed Dickman (NICAP)				

During the early morning hours, the witness went to the window and saw three "very large" saucer-shaped objects hovering across the street. A "ground crew" of 10-12 figures, wearing dully-luminous "cube-type" uniforms, were milling around, as if in search of something. A very low-pitched hum heard, but no barking by the witness's dogs, or others in neighborhood. When two of the "men" approached her driveway, the witness took alarm and returned to bed, where she fell to sleep immediately. There was no confirmation of anything unusual from any of her neighbors, and no traces were found.

73-59	Type B: Br, 1 Obj, 2 Ents	G-T
	Investigator: Unknown	

A sentry was climbing down from his lookout post on the perimeter of the base (30 km NW of Venice) when he saw, in a field close by, two "individuals" dressed entirely in white and no more than 1.5 meters (5 ft) in height. Near a hedge was a small "spacecraft," also white. The beings then went toward the machine, boarded and departed in total silence. The sentry coming on duty also observed the departure, and marks were found on the ground later. The matter was investigated by the military and classified "top secret."

Two youths, 16 and 17, told police they had seen a ball of fire land near the railroad station. The glow went out, and they then saw something "approximately human" but globular in shape, with two eyes in a white face, and little red and yellow lights on its head. Frightened, they hid behind a wall but the entity followed them there; they pelted it with stones and ran to the police station.

73-61	12 M 0200 Vilvorde, Belgium	1	Hse
	Type C: Sev Min, 1 Obj, 1 Ent		
	Investigators: Jean-Luc Vertongen, of SOBEPS (Societe Belge d'Etude des Phenomenes Spatiaux)		

Upon arising to go to the bathroom, the 28-year-old witness observed from his kitchen window a small (3.10 meters) figure in the enclosed courtyard behind his house. The entity wore a close-fitting, luminous green coverall and had a clear spherical helmet over his head, which was attached by a tube at the rear to a backpack on the being's back. He was using an implement similar to a mine detector to examine brickbats in the courtyard, and observed by the witness from the rear, in a three-quarter position. When the witness played his flashlight on the scene, the being turned toward the window and held up one hand, displaying the V-sign (or, more currently, the "peace" sign) with two fingers. The head was dark except for two brightly luminous eyes, over which were seen eyelids that blinked by lowering over the luminous iris. The entity then turned toward the wall enclosing the yard and walked up the sides stiff-leggedly, at right angles, clearing the top and disappearing from view on the far side. Several minutes later, a disc with flashing colored lights and a transparent dome on top, arose from the other side of the wall. Inside the dome the witness could see the little being; it rose vertically slowly, rocked back and forth and then shot off into the sky at high speed. The witness had already had one other observation four months earlier, with others, on the Belgian seaside; and four months after the December encounter, he and his wife and others saw still another object as they drove to Brussels.
