Education as Transformation

Vol. I — Individual and Cosmos

The first volume defines the relationship that needs to be built between an individual and the Cosmos in order for transformation to take place, then details the value and process of questioning that leads to inner discovery. “I have been a headmaster, teacher, and principal of various private schools. Through my experience, I envision the following goals for education:

- To eliminate war
- To make everyone free from want
- To eliminate crime through education
- To wipe out the sources of disease
- To prove the immortality of man
- To contact the Higher Worlds”

Education as Transformation

Vol. II — Basics of Education

This book defines what should be the purpose and direction of education in the new millennium. “When critical times come, people, groups, nations, and humanity search for new education because they face life and find that the education they received previously cannot solve their present problems. This is a very important thought. When you suddenly feel that you are inadequate or powerless to solve the problems of your family and your life in general, in order to make a breakthrough you desire to have a new education or a new tool in your hand to solve your problems.”

“Education without a universal goal burns its container. That is what is happening now, everywhere while millions are anxious to learn more, to fill their stomach with knowledge, they have no ability to use that knowledge to free humanity from hunger, pollution, taxes, exploitation, disease, and crimes.”

Spiritual Regeneration

“Spiritual” means practical, factual, tangible, provable progress toward future accomplishments. When you are progressively striving for achievement, then you are spiritual.

“Regeneration” means that your physical, emotional, and mental natures are slowly inflamed with the purpose and the vision of the future. It means that you say: “In the future, I am going to do these things; I am going to be something; I am going to create various activities and projects in the world; I am going to master myself”

Spiritual Regeneration shows how this striving creates a tremendous fire in us and how this fire energizes our physical, emotional, and mental natures and regenerates us.

The author includes wonderful, practical daily exercises that are a great help in attaining spiritual regeneration.

Sex, Family and the Woman in Society, 2nd ed.

It is now time to face the real values of man, woman, and family.

What are these values? How do we recognize them?

Torkom Saraydarian has paid the most honorable tribute to the family unit. This entire work is based on the fact that women, men, and children are sacred. An entire spectrum of human associations is examined. Chapters include discussions on the Philosophy of Sex, How Men Affect Women, How Women Can Attract Good Men, Harmonious Sex, The Enemies of a Family, Responsibilities of Parenting. Additional subjects are the responsibilities of women, women as leaders and standard bearers of mankind, the essential differences between men and women, and much more.

This is a daring and shocking book. It can serve as the basis upon which strong and healthy individuals and families are built.

Woman, Torch of the Future, 2nd ed.

This book is based on the concept that couples who want the most beautiful and bright children and want to have a strong family will have to prepare themselves, even in their selection of a mate. Women can no longer afford to ignore their innermost concerns.

The author discusses preparation for marriage, the beautiful marriage ceremony, how to prepare for pregnancy, and the needed care while pregnant. Included are guides for the mother, the father, and the education of the child, and the woman as the torchbearer for humanity.

A challenging book. Much has been done to denigrate women and their relationship to their men and children. The author presents a supreme vision that women can attain only when their contribution to humanity is understood and embraced.

The author spent years meditating and contemplating on the role of the family in the spiritual life of the individual. See also the **Family Values** booklets.*

A comprehensive study of *The Great Invocation*, a world prayer of dynamic proportions.

The author gives clear directions and reasons for reciting *The Great Invocation* and for the creation of Triangles. A Triangle consists of three people (not necessarily at the same physical location) who, at an appointed time, say *The Great Invocation*. This powerful prayer is one of the most beautiful and important prayers given to man in the twentieth century. The author explains what the prayer means, verse by verse, and explains why it is said, and why not to change the words.

Chapters include

- The Esoteric Idea Behind Triangles

The influence of the zodiacal signs on human nature is truly great. Regardless of your birth sign, you will be influenced each month in a way that is particular to that month's zodiacal configuration. Instead of fighting the energies coming to you, you can learn to benefit from them.

Each month, the Sun enters one of the twelve signs of the Zodiac. During each period, special energies are available that can be used to better yourself, accomplish tasks, and eliminate negative characteristics in your nature.

The author explains the signs of the Zodiac, discusses the characteristics and keynotes of each one and offers specific meditations for each month.

By using the best characteristics available to you each month as well as the best available under your particular birth sign, you will be guided to enrich and improve your life.

The Flame of Beauty, Culture, Love, Joy

A most joyful and inspiring book. This book is for those who have wished to have a real understanding of the meaning of culture, beauty, love, and joy. The author does a superb job explaining these concepts. Here is a sample:

On Beauty: “Man is created to manifest beauty.”

On Culture: “Culture is the translation and interpretation of beauty.”

On Love: “Love is not a sentiment. It is not an emotional attitude. It is the most powerful energy, the core of which is within the human being.”

On Joy: “Joy is not conditioned by outer circumstances; it is like a beacon, the foundation of which rests on the ageless rocks.”

This is an in-depth study of these four essential conditions of life.

The Creative Sound

Sacred Music, Dance, and Song

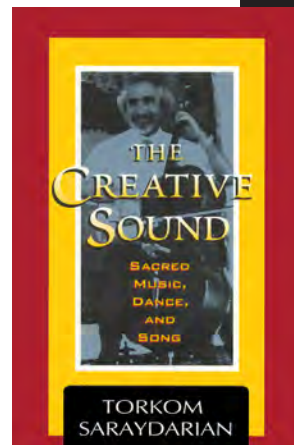

Sacred music and dance is designed for breaking patterns and crystallizations. This is necessary for us to evolve.

“A man who has reached perfection in three levels and is fused with his Soul is a unique manifestation of music. This is a factual statement and not a mystical dream. All the organs, glands, centers, and systems eventually develop their proper frequencies and integrate and align. They first produce various melodies. Then the symphony emerges. Thus a man becomes a living music in Nature.”

“If once our ear opens in higher states of consciousness, we will see that the whole Creation is music that is based on three concepts—harmony, unity, and synthesis....”

“Manifestation is densified music.”

From My Heart

A collection of sacred poetry depicting the inner journey of Torkom Saraydarian, one of the most prolific and creative artists of our time.

You will be moved to joy, tears, and wonderment as you read these poems about his philosophy, his parents, his sisters, his childhood, his deep inner yearnings.

“Poetry is making love with your visions and with the deep feelings of your heart.”

“Readers of poems are not average people. They have abstract and practical minds, plus the light of Intuition. It is very important to have creative imagination and visualization to catch echoes of the poems that no average ear can hear.”

Reading deep and sacred poems and contemplating them helps us build our higher powers. We are immediately raised into a new level of consciousness as we try to understand the poems’ underlying meanings.

The Bhagavad Gita

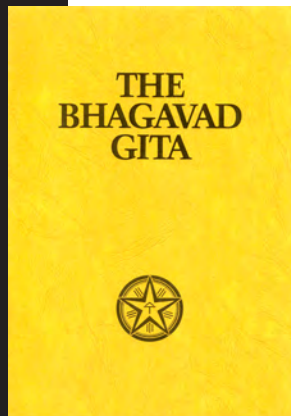

A timeless classic of India translated from the original Sanskrit by Torkom Saraydarian.

The Bhagavad Gita is an epic poem contained in the larger allegorical drama, the *Mahabharata*.

The story depicts the personal struggle of a warrior faced with the most difficult choices in his life. We identify with him because his crisis is our crisis. As a response to the warrior’s despair, the Teacher explains the basic tenets of the Ageless Wisdom, such as detachment, responsibility, life and death, struggle and choices.

It is written in a beautiful verse form, easy to understand, and is particularly suited for meditative study.

* (Meditation course on the *Bhagavad Gita*, originally designed by Torkom Saraydarian, is available at TSU.)

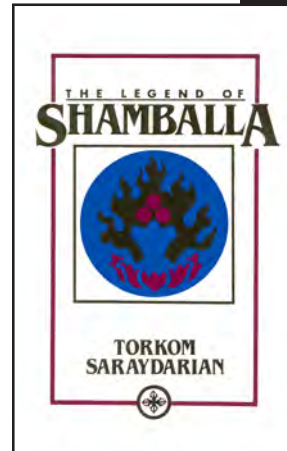

The Legend of Shamballa

Shamballa, the “White Island” referred to in many religious traditions, is said to be located in the Gobi Desert. Shamballa functions as the head center of this planet, where the Will of God is expressed.

Written in verse form, this book describes the legend of creation, the function and make-up of Shamballa, how Hierarchy was created, and how humanity is helped in all the fields of endeavor by Great Ones. It gives a great vision and hope for those working for the betterment of mankind.

A profound, extremely beautiful and poetic work. A book of hope and glory for the future.

Hiawatha and the Great Peace

Hiawatha was a heroic leader of legendary proportions in the Native American traditions, who formed the confederacy of the Great Peace to unite the Indian tribes. Traditions tell us that he was overshadowed by a great Spirit who guided him in his daily labor.

We see in this epic poem how the art of real diplomacy and psychology was used. We see the true value placed on women as leaders in the family and in tribal relations. We also see how the Great Peace inspired the American Constitution.

Torkom Saraydarian's deep research inspired him to write this beautiful account of the life, philosophy, and work that brought unity and integrity to many tribal nations. Tribal elders of many Indian nations use this book to uplift their people, but it is also a model for right relations for all humanity.

Buddha Sutra

A Dialogue with the Glorious One

An intimate dialogue that reads like sacred music. Each poem is a reflection, a question and an answer to life's most pressing challenges.

Torkom Saraydarian writes, "This book will help you keep your spiritual equilibrium in the midst of the turmoil of life and help you be a point of light, service, and loving understanding."

"During my writing of this book, I was able to penetrate into my soul a little more and into the meaning of the Law of Compassion. I felt that the Lord Buddha was teaching this Law of Compassion. I felt that the Lord Buddha was teaching this Law to humanity through His every word and through every action in His life."

(Gorgeous red cloth cover with ornate gold leaf design. Suitable for a special gift.)

I Was

An immensely intense dramatic work about the process of becoming a wise and soul-infused woman.

What happens when a mature woman finds she is no longer a sex object and suddenly discovers that she needs to be honest and true to her inner self? This is a moment of shock and intense internal questioning.

I Was is an intimate look inside the life of a film star about to undergo the most stunning revelation of her life. She has lived and loved, and now she finds herself in the dark night of her soul. She looks at her life with the wisdom of a mature woman, and places her actions and choices into a perspective that will afford her the opportunity to live the remaining part of her life as a mature, wise, and soul-transformed person.

Through this woman's eyes, we look at our own life, its meaning and direction, and set our sights on the true purpose of our life.

Thought & The Glory of Thinking

An enormously helpful and insightful work on the mystery of the mind and thinking.

“Our future is built by our own thoughts. Not only our physical body but also our future activities, our future positions, our future talents, our future victories and achievements all are built in the little, little thoughts that have been accumulated throughout the ages. They become huge and influential, and eventually they show us that whatever we thought, that is what we are going to see with our eyes.”

“The Science of Thinking gives man the keys to open all the mysteries of Creation. As man creates integrity within himself, enabling his nature to think harmoniously, in the same way the nucleus of a nation or of humanity must create integrity until all men and women in the nation think in harmony with each other for a supreme goal, for each and for all.”

In the Ageless Wisdom teachings, we are told about heart energy and the fire of the heart. This is the essence of psychic energy. Psychic energy puts our heart in contact with the distant Heart of the Cosmos, and our heart is filled with the treasures of the Cosmic Heart. This is how a human being finds right direction, develops the virtues of the heart, and is able to heal his bodies. Unless your heart is in contact with the electromagnetic field of the Cosmic Heart, you will be like a wanderer in the desert and live in a way that is against your own supreme interest.

Learn how to contact the Cosmic Heart, be in tune with It, and use its psychic energy for healing, upliftment, and energy to carry out your daily labor.

The Science of Meditation

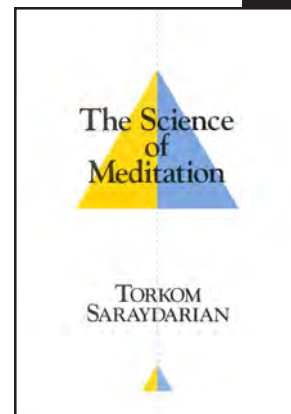

Meditation is clear thinking in the light of your Soul!

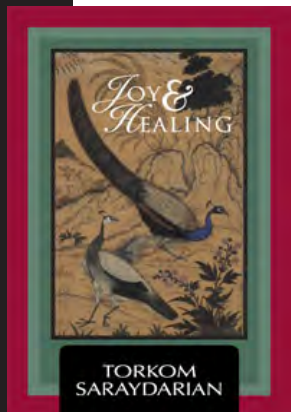

The Science of Meditation offers the safe and sane way to practice this ancient art. It clearly explains how to meditate using the "seed thought" technique in thinking where the higher mind is trained to analyze an idea from various perspectives. By practicing this method of meditation, we build our "rainbow bridge" to higher consciousness and we are able to connect our souls to higher dimensions.

This book offers simple, step-by-step methods of meditation. The author offers encouragements and warnings. Special monthly meditations are discussed, as are the major festivals of Aries, Taurus, and Gemini.

A primer on meditation, a must for any serious person who is seeking a clear guideline in this timeless and essential activity.

Joy and Healing, 3rd ed.

"Joy is a state of beingness in which all evil currents in you are arrested, all attacks of dark forces are repulsed, a shield is built around you, and the watchman in you is alert."

We have all had experiences of joy in our life which have been locked away and encapsulated. We can be uplifted and healed when we bring out this joy. *Joy and Healing* is a must for anyone who works in stress related jobs, who is bothered by the lack of true happiness and wishes to make a real effort to overturn these patterns.

Joy is not the absence of problems and tensions. A state of joy is one in which our true being shines out and overcomes all obstacles with grace and dignity. Joy helps us pay our karmic debts and links us ever more closely with the Divine Energy of Love.

* (Meditation courses on *Joy & Healing* in English and Spanish are available through TSU.)

New Dimensions in Healing

This comprehensive volume describes the entire healing process, both inner and outer. The premier book in the field on the constitution of man, the etheric body, and the centers or chakras in each body. Also included are chapters on the various modalities of healing. Many exercises, visualizations, and meditations are given.

A textbook on the psychological and spiritual healing methods.

"We are of the opinion that taking a few pills and a few injections will solve our problems. In reality this is not true."

"Healing is not an outer phenomenon only, but essentially it has to do with our emotions, thoughts, motives, expectations, aspirations, and attitudes. Our bodies must be oriented toward the ideal, through the purification process and through the payment of our karma."

Transformation

Methods for the Transformation of Life

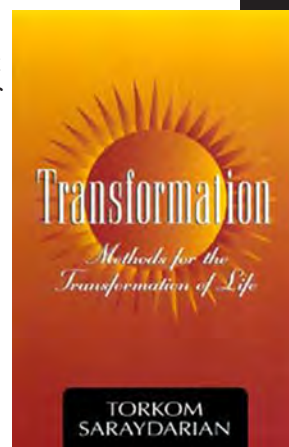

This book is a transcription of an intensive seminar on the topic of Transformation given by Torkom Saraydarian in Agoura, California, in November of 1986.

“The seminar was planned and presented so that the participants would have certain inner experiences that would help them establish contact with the Higher Self and with the Divine Presence in the Universe. It was intended to be a period of deep experience. Book knowledge and information are collected in the lower mind. Sometimes we cannot use this knowledge until we have “supernatural” experience, something that hits our soul and makes us realize that we are not human animals but angels - that we are very advanced souls and citizens of the Universe.”

Cosmos in Man

“Man is Infinity. When we know man, we will know the Cosmos. Man is not only a replica of Cosmos, but a living indicator of all that transpires in Cosmos. In the future, man will be able to use a living human form to forecast coming events on the planet and in Cosmos. Man is the most sensitive instrument ever created in the Universe though his mind records only a small part of all impressions that come from Cosmic events and reflect themselves in the mirror of his etheric, astral and mental form.”

Torkom Saraydarian describes his search for the Ageless Wisdom, monadic evolution, defines the constitution of man. Included are meditations on the Seven Rays, how to contact the Masters, and many more exceptional chapters for serious and heavy thinking men and women.

Christ

The Avatar of Sacrificial Love

A deeply moving account of the life and message of Christ from the tradition of the esoteric Teachings.

Christ was an Avatar who presented to humanity the power of unconditional love. His message embodied a life full of deep compassion, beauty, a sacrificial life of service, simplicity, humility and total fearlessness.

Torkom Saraydarian shows how the life of Christ forms an integral part of the Purpose and Plan of our planetary life and how Christ is part of cyclic appearances of great Saviors. We get deep insight into the identity of Mother Mary, the three Kings, and how the co-workers were gathered to help the new-born savior. Then we journey through the days and years, seeing the training, the initiations, and the sacred messages given to humanity.

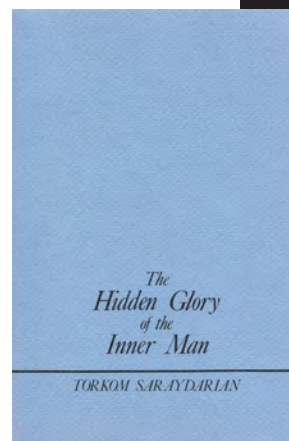

The Hidden Glory of the Inner Man

For those who have experienced something of the soul within them, which the Tibetan Sage calls “a beauty and a power, an active liberating force, a wisdom and a love...,” this book will speak to their hearts and will enlighten their understanding.

The basics of the Ageless Wisdom are presented in this gem Torkom Saraydarian’s first book on the human soul and its relationship with the Solar Angel. The difference between these two has been made clear for the first time.

Understand the phases of development that the human soul undergoes until it reaches the Spiritual Triad and becomes fully aware of its Divine Will. We recommend this joyous survey of the spiritual path we all must travel to discover our hidden glory, the Self.

Karma & Reincarnation

“Karma” means cause and effect.

“Reincarnation” is the belief that the human soul is eternal and lives many lives on its journey to return to its Divine Source.

Karma is not punishment for ill-deeds but a supreme way for nature to heal wounds created by our actions.

“Sometimes karma works in the following way: suppose you went close to a porcupine and he projected ten needles into your body. Karma is like taking them out of your body, one by one, and releasing you from the pain that afflicts you.”

The concept of reincarnation shows us that nothing is ever lost in the Universe. We have continuous opportunities to put our life on the right path. Eventually, through trial and error, we learn our lessons and move on to higher levels of service. Reincarnation shows that our soul is universal. There is no religious, ethnic, nor time separateness.

“The glorification of the aura begins with purification of the aura, in which the colors achieve their maximum translucency and stability... This is called ‘the shield’ in some esoteric literature. It protects the person from any kind of psychic attack... When it reaches its pure tonality, it releases the fires of the etheric, astral, and mental centers and the Chalice, which radiates as twelve ray colors from the heart, around the entire aura. Other Worlds

What exists beyond our physical world? What happens after we die?

What can we learn from near death experiences? Where do we go when we sleep?

Other Worlds describes, in detail, every level of existence beyond the physical plane. It answers questions about life that we ask, such as: How do we die? How should we perform last rites and memorial services? How do we reincarnate?

Other Worlds teaches us how our world operates and who inhabits its many levels. It teaches how we can have conscious contact with higher worlds, and what sort of contacts to avoid.

Other Worlds teaches us to recognize that every single action taken, word spoken, emotion felt on individual, group, and national levels in our physical world has direct and immediate consequences on every level of existence.

Dialogue with Christ

2nd Revised Edition

This book represents a personal yet universal yearning to contact Christ and understand His true message. Torkom Saraydarian's questions are our own; his doubts, ours; his anger, ours; his recognition, ours. This dialogue presents a measure, an inspiration, a striving, an expanded sense of spiritual responsibility.

A dialogue lets the reader enter the very intimate moment where a person of deep philosophical insight "wonders" about what it all means. The reader and the speaker become one — and in a rare moment, the reader has the opportunity to ride the thought-waves of the deep thinker, becoming one with the questions, answers, and realizations.

You will deeply appreciate the Mystery of Christ and His true vision like never before.

Obsession and Possession

“Some people may ask why we should write about such dark, painful subjects as obsession and possession. We bring these subjects to light because in knowing who our enemies are and how they can attack us, we can try to create more health, happiness, joy, success, and prosperity in our lives. When people have clarity and simplicity in their minds, hearts, and bodies, they become successful, victorious, prosperous, creative, beautiful, and joyful.

“The main obstacles on our path to success are intruders from and inside and outside of us who create short-circuits in our systems.”

A very important and penetrative look at a very serious epidemic that ails so many people all over the world. You will learn how to identify the causes of obsession and possession and how to protect yourself from them.

Dynamics of the Soul

Each of us is a Spark related to our Source through a thread of light. It is part of the Spark which eventually will be the path through which the Spark will travel back to Its Source. That is why we are told that man is the path itself.

The Spark has different names on Its path of development. For example, when It is really captured in the physical body and totally identified with it, we call It the “sleeping spark,” or the reflection. When It awakens and wants to be aware of Its powers and destination, we call It the “pilgrim.”

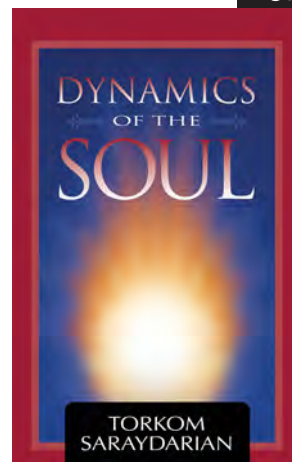

When It arrives on the mental plane and has highly organized the three bodies we call it a “personality.”

When it further advances and harmonizes all Its activities in the light of the Inner Guide, we call It the unfolding human soul.

When It releases the Solar Angel and stands on Its own, we call It a Soul or an Arhat.

When It advances to higher realms, we call it the Spiritual Triad, then the Self or the Monad or the Divine Spark.

The Psychology of Cooperation and Group Consciousness

In this farsighted book, Torkom Saraydarian gives the elements that are needed for cooperation and global unity.

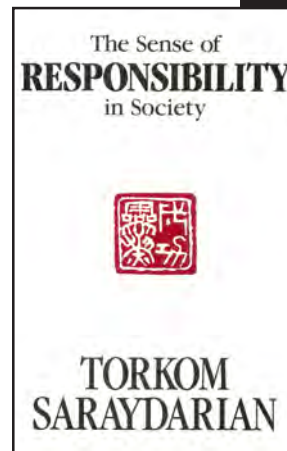

The Ageless Wisdom Teachings give the fundamental qualities needed for a truly global outlook. In the future, it is cooperation and responsibility and not competition that will drive our interactions with each other.

“Every time we fail to establish cooperation, we prove our own intellectual, spiritual, and moral failure.” Torkom Saraydarian reveals, through the eight principles of group consciousness, how to stop seeing ourselves as separate from others and begin seeing our link to all humanity.

If you are seeking better relations and communication with everyone—friends, a spouse, family, and larger groups—you will love this book.

Spring of Prosperity

“Everybody in the world wants abundance, prosperity. Some want it in the form of money, property and belongings. Other want to be rich and prosperous with their creativity, ideas, and beauty. Still others want to be prosperous in love, in compassion. Others want to be rich in their heart qualities, vitality, and enthusiasm.”

This book describes how a person can be prosperous and keep the prosperity flowing in terms of both material and spiritual wealth.

All that exists belongs to man. If a man frees himself from the limitations of the physical, emotional, and mental bodies, he has the Universe. He can enjoy all that he wants. In that state of consciousness, the sense of “mine and yours” disappears. In the domain of Infinity, all that is mine is yours, and what is yours is mine. Poverty is separatism. Abundance is in unity.

* (Meditation course on *The Spring of Prosperity* is available through TSU.)

Initiation, The Path of Living Service

Every initiation is a breaking down of barriers that exist on the way of our total freedom. These barriers can be our own creation, or they can also be our accumulated karma on many levels of the seven vehicles which we use. Initiation is going beyond barriers.

To take initiation means to enter a higher level of consciousness or a deeper relationship, communication, or awareness. Some people think that when a Master initiates you, you suddenly expand your consciousness and you are purified and perfected. On the contrary, real initiation is a process of great labor, through which you gradually build your vehicles of communication and through them achieve greater relationship with the centers of light, love, and power within the planet and the solar system.

Breakthrough to Higher Psychism (Vision Series #1)

An essential introduction to understanding the development of the human soul, its psychic abilities and its challenges.

Breakthrough clearly differentiates what is true higher psychism as compared to lower psychism. Lower psychism consists of mediumship, channeling, and other such practices. Lower psychics are in danger of being controlled by entities, astral corpses, impure bodies, and vices.

Higher psychism is the ability to use your own powers, developed to such a degree that you are able to exist in various planes other than the physical, and you are able to contact higher sources of knowledge directly instead of being led by corpses and entities.

Only in higher psychism is your soul able to contact the depth of the Ageless Wisdom mysteries.

The Year 2000 & After (Vision Series #2)

A great Sage stated that in May of the Year 2000 a fiery stream of energy will be released toward humanity from the highest Center on this planet. Torkom Saraydarian reveals what this means to all of us. He states that we can do ONE of three things:

First, totally disregard this energy and continue our pollution, hatred, greed, and destructive behavior.

Second, increase our own individual or national will to such a degree that we cause great destruction on Earth through wars.

Third, respond to the energies by using them to build a better life and using our creative energies to resolve all the problems facing us.

Most importantly, the author shows how we can go about preparing and improving ourselves in order to meet the demands of the coming decades, well beyond the year 2000.

The Purpose of Life

(Vision Series #3)

If we do not know the purpose of our life, we live a life that is confused, full of crises, nonproductive, and frustrating. It is never too late to ask and find out what is the real *purpose* of life.

Torkom takes a simple and logical approach to this dilemma and gives concrete directions on how to resolve it. He shows how all of us have one supreme purpose: to become truly one with our Divine Source. We also have a purpose in each lifetime, and it is very important to find it so we can live a goal-fulfilling life.

In this book, Torkom Saraydarian show you how to define purpose, how to find it, how to organize your life so that you can meet your obligations, how to make sure you have the right purpose, and how to accomplish what you set out to do. By actualizing the guidance given in this book, we can find purpose and direction in our life.

The Flame of the Heart

(Vision Series #4)

This book is about the Heart, about the Core of our being in which there is the Life, there is our Essence.

The political conditions and economic problems of the world, as well as the problems in our families and societies are due to the fact that our heart has been left behind. Its whispers are not considered safe advice, and they are easily neglected.

In the coming ages, the importance of the heart will be discovered all over the world. As we build universities to develop the mind, we will also build universities where the heart will be developed to balance the mind.

The Flame of the Heart tells how to listen to, heal, develop, and use the heart in our family, business, national, and global relations. It shows us how to unite our heart with our mind.

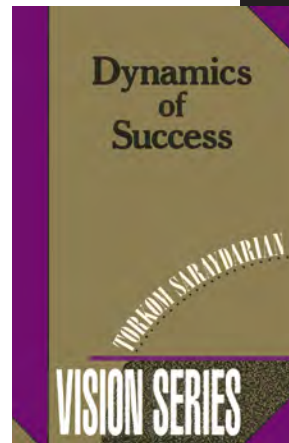

Dynamics of Success (Vision Series #5)

“... You must be physically successful—have money, health, a home, clothing, and all that you need to be happy. But all things will work against your ultimate success if you do not have spiritual success.”

“What is spiritual success? You are going to deepen your sensitivity, increase your knowledge of the natural laws, purify your heart, organize your mind, and build those bridges that put you in contact with higher sources of energy and knowledge.”

Dynamics of Success is an integrated approach on how to achieve success in whatever you want to do in life. Torkom Saraydarian reveals the three avenues of success: the physical and material requirements, the spiritual qualities needed, and the specific hindrances that must be eliminated to have true and everlasting success in your life.

The Mysteries of Willpower (Vision Series #7)

We have intelligence, we have love, but we lack spiritual will.

“Willpower is the energy of the Creative Principle in the Universe. It is the power that creates, sustains, and destroys. Because everything is emanated from this principle, the Core of every atom, cell, form, entity, and soul has its own willpower. It is this inner Core or inner Divine Spark that is a portion of that energy of the Creative Principle of the Universe. It is this willpower that gradually paves the way for you to direct your steps toward Home, toward the source of the Creative Principle.”

Learn how to develop and maintain your spiritual willpower and use it effectively. Specific examples are given throughout the book.

This book puts you in charge of your life. It helps you see your link to the greater will and use this link in the betterment of life.

Three Remarkable Women by Harold Balyoz

The development of Western science in the nineteenth and twentieth centuries had nearly overshadowed the existence of the much older, more profound and complete Eastern, or spiritual, science. This spiritual science was brought to the attention of the west by three remarkable women: H.P. Blavatsky, Helena Roerich, and Alice Bailey. The work of Torkom Saraydarian was founded on these writings.

This book contains brief biographical sketches of each woman, followed by excerpts from their writings.

The TSG University

There is an increasing need for leadership in the field of esoteric knowledge. More and more people are becoming disillusioned with the teachings given to them by opportunists, by people who have good intentions but are full of glamors and vanities, or by people who want to use the Teaching as a business to raise money.

Great damage is done to people who approach the Teaching with sincerity in their heart and are caught in groups, institutions, or organizations that are only for social activities or that function as traps for exploitation. Some of these searchers gradually forget about their quest and adapt themselves to their environment. Some of them totally suppress their aspiration and spiritual striving because of their disillusionment. Only a small percentage, through discrimination, continue their search to find the proper field where they can grow and serve.

The number of true searchers is increasing. We must prepare ourselves to meet their need and at the same time safeguard ourselves from the dangers of falling into vanities, glamors, or of using the searchers for our own interests.

Torkom Saraydarian, *Leadership I*, p. 16.

We specialize in training the teachers and leaders of the future by using primarily Torkom Saraydarian's works. Our focus is on practical self-transformation as well as the academic study of the Ageless Wisdom.

We firmly believe that Torkom's creative expressions of the Ageless Wisdom Teachings are the ideal form for spiritual training in the 21st Century since they represent a true synthesis of all spiritual foundations. Students will focus on his works and slowly add readings from the works of other great teachers such as Alice A. Bailey, Helena Roerich, H. P. Blavatsky, as well as from world classics in religion and philosophy.

The University offers a variety of courses to suit your individual needs. These courses include **meditation lessons, personal enrichment programs, undergraduate and graduate programs** as well as **Teacher training**.

These are offered both on site at our TSG Center as well as by correspondence via mail or through our website.

OM Pendant

A beautifully hand-crafted silver pendant specially made for TSG in Lima, Peru. The image of the Sacred Word, OM, in Sanskrit is a powerful symbol of unity of the spirit and matter.

The OM Pendant comes with your choice of Silver Chain or Rubber Cord, in a Velveteen Bag (red or black), with a descriptive card. The pendant is one inch in diameter, chain is 20 inches, rubber cord is 15 inches.

The Sacred Word symbolizes the two worlds - the manifested one, the world of forms, and the formless world. It symbolizes also the bridge between these two worlds through which the formless passes to the world of phenomena, and the world of phenomena passes into the world of noumena, into the formless world, thus keeping the manifestation in cyclic continuity.

Total Prosperity & Abundance Seminar

Two Part Series recorded live. Now available on CD with printed support materials

Gita Saraydarian has presented two-day seminars on ***Total Prosperity and Abundance*** in London (UK), Lima (Peru), Cave Creek (Arizona), and Los Angeles (California). People attending these seminars came from many walks of life, all wanting to re-define the priorities in their lives and have a deeper, more esoteric understanding of the meaning of abundance.

Students of religion and spirituality the world over often have very wrong ideas about abundance and prosperity. Somehow, the image of poverty, lack, and suffering has become synonymous with being spiritual. Torkom wrote about being abundant and prosperous throughout his life and he emphasized why we need to think of great abundance and how we can use the abundance that we have to better life on Earth.

The Seminar is a result of Gita's intense research and study of the spiritual principles that operate in nature and help us to achieve total prosperity and abundance. The presentations are based primarily on the Teachings of Torkom Saraydarian and the practical experiences derived from the application of the Teachings. The presentations are both practical and deeply spiritual. The work proceeds from the inside out.

Gita Saraydarian studied these writings and organized a two-day intensive seminar to teach what she had learned and practiced. These seminars were recorded live. The CD's and support materials are fresh and dynamic and bring to your private study all the energy and enthusiasm of the live presentations.

During this intensive two-part seminar, you will learn how to change your thoughts, wishes, and plans so that prosperity can be yours. If you are willing to do the work, then there is every reason to have a successful and abundant life. Gita presents the natural laws that govern prosperity and the ways to apply these laws in our daily life.

The key to prosperity is to know our blockages to abundance and learn how to remove them. The presentations will include lectures on prosperity, success, visualization and meditation practices to enhance your life, and a step-by-step implementation plan for your continued success and prosperity.

The topics presented are:

- How to define your prosperity
- Prosperity Laws of Nature and how they work
- Visualization plan to receive prosperity and abundance
- Subconscious recordings and outdated thoughtforms about abundance
- Spiritual Foundations for Success
- Psychic Energy and the Fire of Space
- Your fundamental support system
- Laws of Success
- Thoughts and wishes: what is right and what is wrong
- Implementation Plan for continuous prosperity
- Advanced levels of prosperity consciousness
- Visualizations and meditation and Question and Answer sessions

Gita is committed to bring this seminar to as many people as possible. We hope you enjoy these seminars and grow your life into a truly abundant life, in every way.

We recommend that you listen to the entire seminar, part one for one day and part two for the next day. Then, make the implementation plan and start to do the work. We know you will benefit tremendously from this work and your life will be enhanced in many ways.

Building the Lighted House

A series of 9 lectures on Building the Chalice & 3 Major Festivals of Initiation

By Gita Saraydarian

Presented at TSG Center at Full Moon Celebrations 2007-2008

This series of lectures presents the nine-part process of unfoldment of the petals of the Chalice, the subtle structure that houses the human soul. The light is the human soul.

The Series began with the Cancer Full Moon 2007, ending with Pisces Full Moon 2008.

Each lecture was presented during the Full Moon celebrations. It encompassed the keynote of that particular Full Moon, and focused more specifically on the major work that we need to do in order to unfold a part of the Chalice.

Each recording consists of a lecture, meditation, and healing prayer, which focus on one area of life that presents a specific challenge in the process of building our Chalice. At each three-month interval, the focus is also on one of the three major crises undergone during the first three initiations.

The specific keynote used in each lecture is indicated below.

- #6: Sagittarius Full Moon:** Re-Orientation
- #7: Capricorn Full Moon:** Your Soul — The Inner Christ
- #8: Aquarius Full Moon:** Water of Life – Psychic Energy
- #9: Pisces Full Moon:** The Power of Faith

Gita is now adding three more lectures, coinciding with the **Three Major Festivals of Aries, Taurus, and Gemini** to complete this topic. These three will complete the Building the Lighted House Series and they will focus on the topic of Initiation. Lectures will ship shortly after their presentation (scheduled dates listed below).

The Labors of Hercules Series

Lectures Presented by Gita Saraydarian
At TSG Foundation in 2006-2007

In 14 parts

Teachers of the Ancient Wisdom and Mystery Schools have studied and presented the labors of Hercules in lectures and dramatic presentations from Ancient times. In 1937, Alice A. Bailey, a great teacher of the Ageless Wisdom, gave a series of classes on the 12 Labors in New York. In 1976, Torkom Saraydarian gave a 12-part seminar in Los Angeles, presenting more depth and explanation to the 12 Labors. Then in 2006-2007, Gita Saraydarian presented two introductory lectures as well as a complete set on the 12 Labors in Cave Creek, Arizona.

This 14 part series represent Gita's deep study of her predecessors' work, adding her own insights and life experiences. They are powerful and life changing lectures that will challenge you every time you listen and study them.

The Labors of Hercules Series are organized as follows:

- Two introductory lectures.
- Twelve lectures, each corresponding to one zodiacal sign and one labor.
- Each lecture includes an explanation of the keynotes, and reading of the story from *The Labors of Hercules* by A. A. Bailey with additional comments.
- Full Moon meditation.

How to use these lectures: Begin by studying the first two introductory lectures and read the corresponding pages in the book *Labors of Hercules* by A. A. Bailey. Then, start the work on the first labor corresponding with the full moon of Aries and so on, timing each study with the corresponding full moon.

The 14-part *Labors of Hercules Series* is available on CD or Digital Download

Teachings of Christ, Volume 2

The Esoteric Principles of Christ

In volume 2, Torkom gives the esoteric principles on which the Christ Teachings are based. Why did Christ come to Earth in physical manifestation?

When Christ came to this earth, He had something very, very great to do. Christ came here to build something that was very unusual. He came here to build in the soul of humanity a prototypal man, an ideal man, an ideal woman, a temple that was unique, a temple that will be exactly what was in the mind of God... (p. 210)
