

close encounters.

5. Compulsive behaviour concerning UFOs or ETs, such as voluminous reading of any and everything available on UFOs.

6. Unexplained moodiness or irritability after an anomalous UFO-related incident.

7. Body symptoms or marks characteristic of a close extraterrestrial encounter.

8. Experiencing an unexplained substantial period of missing time following an anomalous incident.

9. Having sudden onset of feelings of social unordinariness.

10. Experiencing a new cosmic awareness and perspective, which frequently breaks into one's daily thinking.

11. Suddenly feeling an affinity for the personal ET-encounter experiencers one sees or reads about, or feeling an attraction to extraterrestrials as somehow familiar.

12. Having the sense of having received telepathic messages from the ETs, or repeatedly receiving gifted intuitions.

13. Having a sense of sharing the space in one's mind with an extraterrestrial.

14. Noticing the beginning of psychic ability, or, if already psychic, noticing a marked increase in psychic abilities.

15. Feeling attracted to a spirituality or religious practice which is based on the in-dwelling of the Supreme Source in all Nature, and as a result, the importance of reverencing all life-forms as related to you.

16. Having a longing for that extraterrestrial individual with whom a person has/feels/he has somehow had contact previously.

17. Giving an obsessive sense of mission, whether clearly understood, vague, or mostly repressed into unconscious mind, (acquired during a close encounter).

18. Having a strong "pull" to travel to a specific area, either with an intuition that a close encounter is impending, or for an unknown reason, (which turns out to be a close encounter.)

19. Having a sense of partial extraterrestrial heritage, either by reason of sharing an extraterrestrial perspective on the Earth situation, or having partial shared genetic heritage with certain extraterrestrials, or having somehow had an extraterrestrial as one biological parent, or having a sense of having been born elsewhere.

20. Having a sense that one's destiny is with the ETs elsewhere in the Galaxy, or a "pull" to go to one's final home, which is an extraterrestrial planet one was shown by the ETs. RB, 1993.■

VI. A PERSONAL ANNOUNCEMENT FROM DR. RICHARD BOYLAN, PhD.

[Clearly Dr Boylan's articles quickly upset *somebody*! Hence this! -G.C.]

I am, as of the date of this announcement (Nov. 7, 1999), making a major change in my involvement with the UFO phenomenon. This change is partially voluntary, and partially involuntary.

From this day forward until the Paradigm Shift, I will no longer write or speak publicly on UFO science and technology, nor U.S. and other governments' back-engineered antigravity and other advanced technology, nor the Rogue UFO cover-ups' criminal activities, including unauthorised kidnapping and terrorising of civilians, nor serve as a conduit for the legitimate government's Acclimation Programme spokespersons' messages on these topics.

Henceforth, I will be focussing my public speaking, writings and messages on the spiritual, mental, psychic, metaphysical, cultural, and personal-transformation aspects of extraterrestrial - human interaction, and I will, of course, continue my work of consultation and clinical hypnotherapy with experiencers of ET encounters.

My moving to concentrate my focus on the spiritual and personal side of the UFO/ET phenomenon is a direction I have already substantially been taking, out of

a conviction that the major point of ET visitation is to nurture human development and cultural emphasis in precisely these areas. So I now entirely focus my public efforts in these areas of the "UFO message".

However, my total withdrawal from speaking and writing about the science, technology and governmental intrigue sides of the UFO phenomenon is not entirely voluntary. Rather, it is in response to a series of threats to my family, especially focussed on one of my children, that I cannot and will not ignore. That benighted consortium of private sector and rogue governmental operations, which is responsible for the down-and-dirty side of the UFO cover-up, has escalated to death threats that I am obliged to face up to. Thus, the change in my public focus in matters ufological.

Because the Down-and-Dirty Cabal are only interested in the power, prestige, and profits which come from their sought-after monopoly on ET-derived science and technology, it is my estimate that by abandoning my efforts to publicise this technology, and human successes in copying this technology, I will

reduce the threat to my family. Besides, I have already largely placed in the public sector, via my writings, talks and webpage (www.jps.net/drboylan/), the bulk of developments formerly hidden by the UFO cover-up.

You all know that I am not faint-hearted. I have placed my personal life, reputation, professional career and savings on the line, in pursuing my research and publicising my findings. In so doing I have suffered enormous personal harm. I can stand that. *But I will not place my family at risk in the face of these escalated grave threats.*

This decision is firm. I ask your understanding, and if so inclined, your prayers or other spiritual support.

At its most fundamental, this struggle between the fear-hate-attack side and the peaceful side of the UFO community mirrors a spiritual struggle in the Cosmos between the forces of Darkness and Light.

May we all advance in love and light.

Faithfully

Richard Boylan, PhD

November 7, 1999

NOTE BY EDITOR OF FLYING SAUCER REVIEW.

We had not seen until now very much of Dr. Boylan's writings on the UFO Problem, and what we had seen has at times inclined me to think that he was one of those very numerous people who (possibly merely gullible or possibly directly influenced) obstinately refuse to recognise that there is, in this "subject" of ours, at least also a very great element that is plainly evil and deeply hostile to our species. If however I am wrong on this point, as may well be the case, and if Dr. Boylan agrees with us on this point, then I feel sure I can say that I agree with all that he says in his article above.

On the question of harassment, threats, veiled or unveiled, and even murders, we all know enough now to be able to perceive that there *is*, as Dr. Boylan suggests, quite probably a secret human, governmental agency of the armed forces or of the security and secret services, in both the USA and in Britain, and elsewhere, which is active in watching, persecuting and harassing - and sometimes *murdering* investigators of the UFO problem. (The latter, by the way, are generally not notable for any interest in **politics** or in any matter that might be considered "politically subversive").

But what we apparently do not know for certain is this:- *Are they acting on the direct instructions of a Government, in an attempt to find out how much some of us have discovered about UFOs, or are they simply the tools of a Government that already **knows** everything about UFOs and is itself already controlled, as many of us suspect, by alien intelligences?*

A third version, which one occasionally hears, is that maybe these are "rogue units" of the Military or the Intelligence Services, who are somehow or other able to operate on their own.

That these agencies do harass and do maim and do kill, I have good personal reason to know for a certainty. An example of their activities here was the murder of the

Englishwoman Hilda Murrell who was killed by Military or Security/Intelligence operatives a few years ago.

We know too - because the former British Police Sergeant Tony Dodd has courageously published the facts in his book *ALIEN INVESTIGATOR* (1999) - that very recently he and his wife were taken out by unidentified American men to a lonely spot in the desert of the U.S. South-West and blatantly informed that, "*if they did not watch their step*" *their bones could end up out there and nobody would ever know what had become of them.* (See also the entire history of the Roswell Crash affair, in which numerous eyewitnesses have reported how they had been threatened with "serious trouble", or "Worse").

All these things are most emphatically occurring. But one must add that, so far it appears impossible to perceive with certainty what the actual roles of our own Governments can be in it all. **That they are the direct (even if unwilling) tools of malignant alien forces which have "taken over" here and are now "in the driving seat" here, cannot however be ruled out.**

It is extremely "interesting" news when we learn that, at precisely the same time as Dr. Boylan, his friend Dr. Roger K. Leir (another Californian resident) - is starting to experience similar "difficulties" in connection with his own research, which lies in the area of alien body implants.

Joël Mesnard, the editor of our French "opposite number", *LUMIERES DANS LA NUIT* (41st year, September 1999) has a lengthy article entitled "OBSTACLES OF HUMAN ORIGIN," which *inter-alia*, dwells on the British phenomenon of the "cornfield circles" and all the fantastic attempts of the British Government and its minions to provide effective "explanations" with the aid of the two famous old "daddy master-fakers", Doug and Dave and others.

For the moment I will discuss only that part of this French report that deals, both with crop-circles and with the "obstacles" suddenly confronting Dr. Roger Leir.

Clearly there is "someone" who dislikes Dr. Leir and his activities just as much as they "dislike" Dr. Boylan's activities. Here is Joël Mesnard's highly instructive little account, about which we must all do some very sharp thinking:-

LES ENNUIS DU DR. LEIR (DR. LEIR's "DIFFICULTIES") LDLN Nov. 1999 (page 4)

Translation from French: G.C.

Our last issue of LDLN, in which we had an article about the alleged "extraterrestrial implants", was just going to press when I learned from the French UFO researcher Gildas Bourdais that Dr. Roger Leir, the pioneer in the extraction of these little objects, was suddenly encountering serious difficulties. Here is a brief summary of it all:

In February 1999 Dr. Leir (already with 35 years of professional career behind him) learned that he was going to have to appear before a tribunal in May 1999 owing to a complaint lodged on March 17, 1994 (!) by a former patient on whom he had performed an operation in 1990 (!!). The reason for the charge - the first ever in his 35 years of professional service - had been a relatively banal

incident, namely *a post-operative infection*. (We all know how the bringing of charges against doctors has become a regular practice in the United States, and is beginning here. G.C.)

Dr. Leir had in fact been already notified and aware of this charge - *five years ago*, but as it had never led to any concrete action against him, he therefore felt convinced that the affair had long ago been settled by the U.S. Medical Board and closed.

Dr. Leir's lawyer, Gregory Avery, who specialises in this sort of affair, explains that in all cases of this kind - that is to say when suspicions are voiced regarding a doctor - the Medical Board's golden rule is always for *speedy action*: if a doctor (in this case a chiroprapist - in the USA termed a "*podiatrist*") - does not have, or no longer has, the expertise necessary for the proper exercise of his profession, he is, quite understandably, *immediately subjected to a general review and scrutiny of his competence*.

Well now, in this case the Medical Board waited five years before embarking on any procedure of the examination and evaluation of the competence of Dr. Roger Leir! there is no "normal" explanation for this astounding delay of five years!

*But it so happens that in 1999 Dr. Leir was now known for his work in researching and extracting mysterious implants from the human body. Most notably, he had been seen, on February 17, on the NBC Television channel, following the appearance of the book **The Aliens and the Scalpel** written by him and his colleague Derrel Sims. (Reviewed in FSR 44/4, G.C.)*

The hearing against him opened on February 16, 2000, and during it, he was not permitted to speak or

even to communicate with the Court in writing! The judge delivered his verdict on April 23: Dr. Leir was to be "put on probation" for three years.

Dr. Leir is not a young man, the shock of this sudden impugment of his professional competence, added to the normal fatigue engendered by his heavy work-load, resulted, on May 24, 1999, in a heart attack, which put him in hospital. (He had already had some heart trouble in 1985.)

The consequence has been that, in a particularly critical period (with all the problems, notably family problems, and financial worries too) his research on implants has clearly had to be halted.

Contemplating the possible 'reasons' for this sudden and scarcely comprehensible "resurrection" of a matter that had been buried and forgotten long ago, AND JUST AT THE VERY MOMENT AS DR. LEIR WAS MAKING KNOWN HIS WORK ON THE IMPLANTS, the comment of Dr. Leir's lawyer is:

"I DON'T BELIEVE IN CHANCE. I BELIEVE IN CAUSE AND EFFECT".

So here, dear FSR reader, in the cases of Dr. Boylan and Dr. Leir, you have something on which to reflect deeply. The offence of Dr. Boylan is that he investigates UFOs. The offence of Dr. Leir is that he finds -and publicizes- body implants from UFOs.

Are these not just two more wondrous examples of the machinations and the devilry of that corrupt and evil Power which controls this entire world and all of us, and that has the whole of "anaesthetised", sleeping, unwitting, and witless mankind by the throat? G.C.■

THE KHOURY CASE (AUSTRALIA), BY GORDON CREIGHTON.

Every UFO report has something weird about it, but this one seems one of the weirdest yet.

We learn that Bill Chalker, one of FSR's Correspondents in Australia, has recently investigated a highly unusual encounter case that involves a possible *alien hair sample*.

The sole participant in the case, Peter Khoury, born in the Lebanon in 1964, emigrated to Australia in 1974, and married there and has a family. He owns a business connected with cement production.

FIRST ENCOUNTER.

Khoury says that during the night of July 12, 1988, he was lying in bed when he felt somebody grab him by the ankles and his entire body went numb, paralyzed. He could move nothing but his eyes. [We have heard of this feature in other cases. G.C.]

On the right side of his bed he could see three or four dark-robed figures, 3 - 4 ft tall, who informed him telepathically that no harm would come to him. Moving his eyes towards his left, he found two more beings there who were completely different - tall, thin, of a "golden" hue, with big black eyes and narrow chins. One of these

also contacted him telepathically, and told him not to worry and that it "would be like the last time" (sic). This being's eyes seemed to be friendly, almost "smiling", as they say.

They inserted a long needle-like flexible tube into the top left-side of Khoury's head, after which he seems to have blacked out.

Upon regaining consciousness, Khoury leapt from his bed and ran to find his relatives (father and brother) who were sleeping in another room. He awakened his brother and found him apparently "groggy". [Perhaps evidence that, as in so many cases, *the aliens had kept the father and brother fast asleep*. G.C.]

On checking the time, Khoury found *that two hours were unaccounted for*.

Next day his wife examined his head and found a puncture. Khoury asked his doctor to look at it, and when he told the doctor of his UFO experience the doctor just laughed at him and ridiculed it.

Months later, Khoury heard of Whitley Strieber's book *Communion*, and got a copy and read it. He saw that the "little Grey" shown on the cover was identical with the smaller type of the creatures that he had seen.
