Dear Mr. Siurot,
I am obliged to you for your kind letter, clippings and the Address articles from "Fate" magazine concerning inexplicable accidents, deaths and mysterious fires, etc. I have read them with interest and I wish to thank you for your kind letter.
I have been reading your book "Spontaneous Human Combustions" with a certain fiction novel, but no doubt inspired on these odd facts. In the year 2004, I read a staggering account concerning mysterious accidents and deaths, which are never explained. Ever since I have accumulated newspaper clippings, newspaper articles and reports of accidents and deaths, which are never explained. I have been reading your book with interest and I wish to thank you for your kind letter.
I have been reading your book "Spontaneous Human Combustions" with a certain fiction novel, but no doubt inspired on these odd facts. Bibliography

though mine is the first book to have spontaneous combustion as main subject, the literature on this subject is plentiful. The works - books and articles - cited below do not in any way exhaust the reserves of supporting literature: they are merely representative studies of, or observations on, a phenomenon which has its own specialized research and medico-legal comment since publication of Jonas Dupont's study of spontaneous combustion more than two centuries ago.
