FLYING SAUCER REVIEW

VOLUME 49/2
SUMMER 2004
Unique in the
world:
Established 195

<http://www.fsr.org.uk>

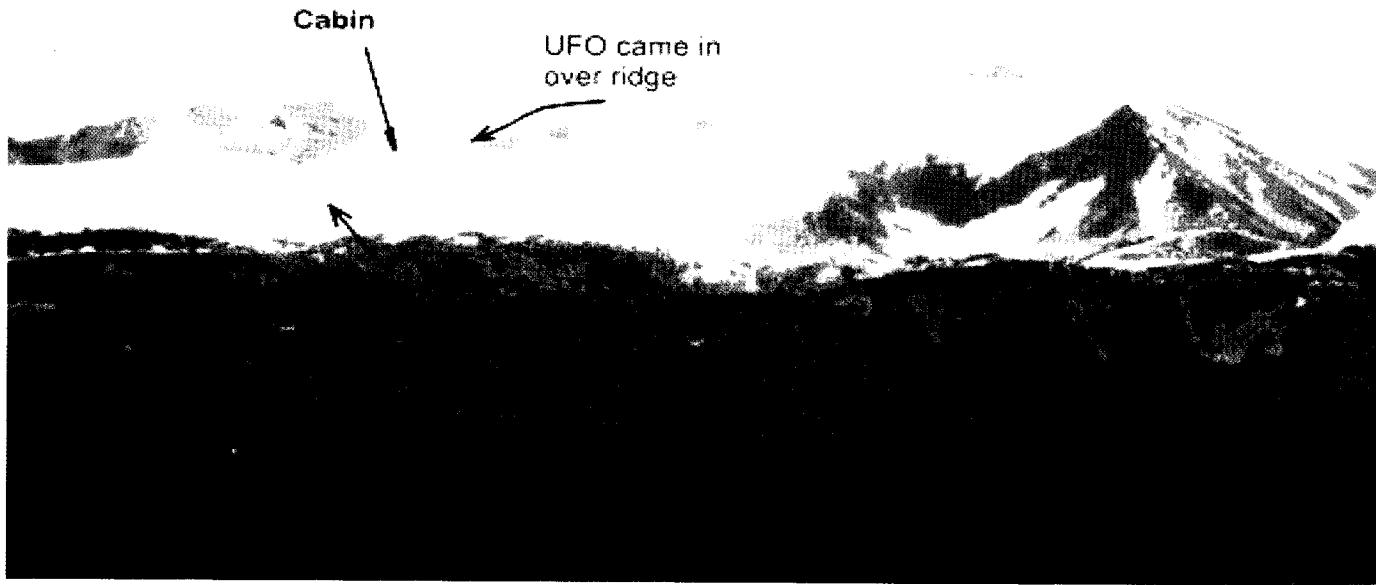

UFO reports continue to flood in from around the world – see inside for highlights and baffling new cases, EXCLUSIVE to FSR

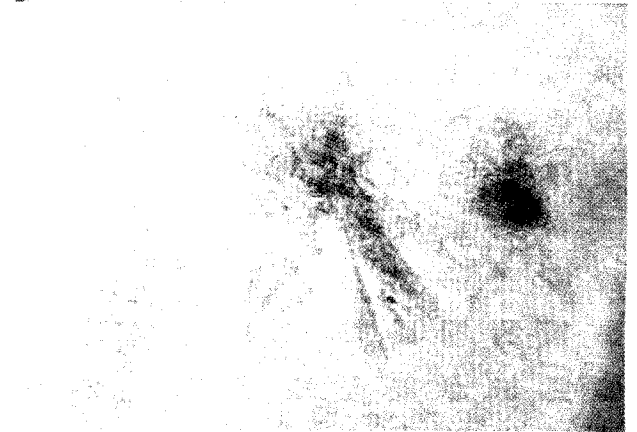

CONTENTS

Guest Editorial.....	2	Huge "boomerang" buzzes car.....	
More 'Flipping' Triangles.....	3	UFO Photographed - and Portugal Military fires at UFO.....	
Flying Cigar sighting by mineral claims Surveyor	7	Entities seen at Silbury Hill, Wilts, UK.....	
'The French Connection'.....	9	Report on the Ozark UFO Conference 2004.....	
Encounters with the Men In Black.....	12	The Real Wonderland.....	
Sightings Roundup.....	14	News Flash.....	
UFO lands in Cuba.....	17	FSR Information.....	Back
Pyramid shaped objects sighted.....	18		

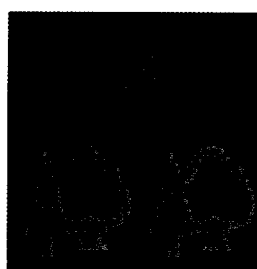

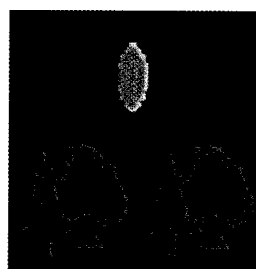

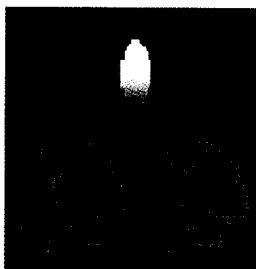

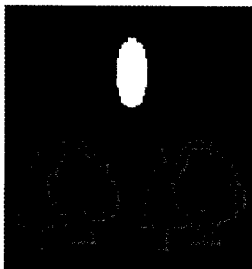

COMING UP...

The whereabouts of the Yukon sighting. See page 7 for the full report.

Left, the 'entities' seen at Silbury Hill and, right, their 'crafts.'
See page 20 for the full story.

Guest editorial: "SCIENCE"

It is astonishing to see how much talk there still is about a "scientific explanation" of the UFO Phenomenon.

The Phenomenon has been a reality for an ever-growing proportion of mankind since it burst upon their consciousness in 1947. (Which of course does not mean to say that it had never existed previously to 1947. Maybe it has "always been there", but we simply weren't smart enough to know about it!)

So, since 1947, vast numbers of people have been beavering away with their typewriters and, later, with their word processors and their computers, churning out reams and reams of articles and scores of books. And what has been the upshot of it all? I have yet to learn of any sure evidence that anybody or any Government has gleaned anything whatsoever about the alien vehicles, about their means of propulsion, or about the source or sources from which they and their occupants come. (It is true that we now know – alas – a very great deal about what the entities are doing to us humans. But this unwelcome knowledge does not seem to have brought any compensating benefit to mankind).

And so I still say: I see no evidence that we have learned anything scientific. Perhaps we ought to bear in mind that the Latin word "*Scientia*" simply means "KNOWLEDGE". AND WHAT WE CALL "SCIENCE" IS *OUR* KNOWLEDGE. UNFORTUNATELY FOR US, WE FIND OURSELVES CONFRONTED BY *SOMEBODY ELSE'S* KNOWLEDGE. And I am left ruminating on the words of Dr J. Allen Hynek who, in the course of extraordinarily interesting conversation with me which ranged over a whole lot of things far outside the limits of our small and young "Science", had this to say:-

"If, of course, the 'floor' of *their* science is higher than the 'ceiling' of *our* science, then there may no possibility of a meeting of minds, and we may get nowhere."

In making such an observation, Allen Hynek was not acting in the least "like a typical American". For one is reminded of the curious fact that the Americans – maybe far more than any other nation – all seem to believe that any problem that exists *is bound to be*

solvable. No doubt this simplistic view of things stems in part from the fact that they are a relatively "young" and therefore "optimistic" people. Members of older communities such as those of Asia would be unlikely to view matters in that way, since they know full well, from their long, long histories, that not all problems – whether problems of Man, or problems of this poor Planet of ours – are "solvable" by Man. (*As we are shortly going to see!*)

Had the average American and average European possessed a better grasp of world history and other cultures (and especially of other *religions*) they might no doubt have developed a far less clouded vision of the "UFO Problem". And the error stems also from the fact that, as soon as the UFO Phenomenon burst upon their consciousness in 1947, it was instantly and automatically accepted by the overwhelming majority of people that, if these UFOs really did exist, then their operators simply *had* to be our "peers", folk from other planets, and, therefore, *ipso facto*, they had to be "other human beings, just like us."

If, as now seems certain, this sort of thinking is a piece of gross folly, and in all probability one that has been deliberately sown in human minds by the alien creatures, then the whole fatuous idea that they are "other human beings who want to meet us" collapses in ruin.

There is in fact not the slightest shred of evidence that any of them are here to "visit with us", or "to meet us". They have doubtless known all about us for ages past, and it may well be that many of them are the true "natives" of this Planet, and were here long before us. And they are here for their own purposes, and for their own benefit, not for ours. They are not "human beings", but creatures from an entirely different order.

If we fail to understand this, and still cling to the daft and ridiculous "E.T." theory of "Visitors or tourists from other planets", our peril will only be the greater.

GC
