Dear Vincent, GADDIS

"Invisible Horizons" is the best recollection ever issued about the power of ocean to produce unorthodox events. In your astonishing book the sea is alive, vibrant with the intentional quality of beingness. "Mysterious Fires and Lights" is a brilliant exposition of intelligent behaviour of intentional luminous spheres (non-human living beings?). You are so the author of two extremely interesting monographies concerning life, the omniverse, the Unknown. For this reason you are, my friend, a very valuable trans-homo-sapiens. By this scrap of paper I like to remember you Who's Who in Vincent Gaddis personality. Go ahead within yourself, Vincent. You have already dropt your unique, Gaddisian output to the world, improved by your efforts. Our thanks, with warmest regards
