Australia

Dear Mr. Simpson,

I am obliged to you for your kind letter, clippings and the impressive article from "Fate" magazine concerning inexplicable accidents, deaths and cremations which took place in 1.958, a pre-war year. The author, Eric Frank Russell, has written a curious book entitled "Minister Barrier", a science fiction novel but no doubt inspired on these odd facts. In the year 1.964 I read a staggering account concerning mysterious accidents and anomalies, "L'Avistione di altri Pianeti opera tra noi", from an Italian consul named Dr. Alberto Perogo. This work is a little chaotic and exaggerated, but it "awakened" me about daily, worldwide and numerous happenings which are never explained. Ever since I have accumulated more than 25.000 press clippings dealing with every kind of accidents and related matters. There is an incredible amount of disasters which occurred under circumstances suspicious of conscious causes. Waves of intriguing fires, spontaneous human cremations, explosions on trucks or trains loaded by inflammable materials, crashes of planes, shipwrecks and other similar events take place during a determined period of time on certain areas. (For instance, Philippines, Columbia, Belgium, Malasia have suffered big waves of "Perogo Accidents" (PA), as I like to name them. Recently a showy avalanche of PA rushed against California, natal state of president Richard Nixon). Some of these accidents supervene in a very strange manner. Frequently the same type of accident repeats over the same area. The disasters "burst" in an apparent spontaneous fashion, and their origin always remain uncoverted. With regard to the victims of the accidents, exists a noteworthy selectivity: children and old people die by thousands "crushed" by Perogo Accidents. An enormous quantity of babies & children perish in unmotivated fires while they are inside their homes and their parents are away. A pile of asylums for aged folk set on fire with a surprising rapidity, the fire springs suddenly from everywhere killing scores of old men and women who burned to death supporting terrible sufferances. The same class of persons -the old- die also in the most mysterious manner: the "spontaneous" (1) combustions. With an insistent frequency the dreadful fire destroys too a lot of hospitals for mental patients. Also many vehicles full of people who goes to or come from a religious ceremony or pilgrimage suffer accidents. At last now I re-fer to most baffling "accidents", rather murder: the spontaneous cremations of suicidals, after they have started the act of suicide. At present I am passionately interested in the fascinating, awful problem of Perogo Accidents. I am more and more convinced that long ago a weird, unknown, unidentified intentional energy, conscious cause or personal entity (the "Unidentified Agents") is cold, efficient and deliberately yielding vast destructions and a great deal of deaths of innocent human beings. I am absolutely ignorant about the WHO, WHEN, HOW and WHY concerning this "apocalyptic" affair. I think it is truly necessary a worldwide research in order to find out the scope and motivations of a such hair-raising facts. If several competent urologists set to work, I hope to know the truth before my hair become white. This is, of course a worth-while investigation.

with my best wishes,
Yours sincerely
