

when ever vibratory degradations become dangerous for the cosmic balance. Lanaforge and his 6 Lanonandek assistants received this saddening appeal meaning a sharp planetary deviation of a humanity.

You know that, in the cosmos, the more a being approaches cosmic perfection, the more he is filled of goodness, patience, kindness, and love. When they received this appeal, Lanaforge and his assistants did their duty by studying the Urantian record which was furnished to them. Lanaforge went even personally to Urantia at the same time than the 14th resident Govern^{or}/General in order to preside upon special meetings with other cosmic Masters present on Urantia at that time. In 1391 U.T. came the arrival of a "Great Master", that word meaning a morontial ascender of human origin whose ascension has been momentarily interrupted because of a mission to accomplish on Urantia. His place and human title was "Dalai Lama".

Later, in 1421 U.T., Lanaforge also declared that the inhabited planet number 606 had attained the second degree of qualitative vibratory degradation, and he launched an appeal to the Father of Norlatiadek in which he expressed his disquiet and the special seriousness of the mentioned Urantian deviation on this famous planet already hit several times by deviation. Accordingly, he asked the Father of Norlatiadek to contact Mikael himself in order to solve the grievous Urantia problem. The Vorondadek trio took care of the "Affair 606 of Satania", by summoning the emergency council of I2. They concluded that the managing Vorondadek, chairman of the emergency council, and the Mediator would contact by communication the 15th General Governor residing on Urantia and ask him a report on the planetary state. Next the Most High Observer on Urantia was ordered to assume the government of the planet and to summon himself the Master Seraphim of Supervision. In face of the persistant worsening of the global vibratory level irradiated by the Urantian humanity, the Father of Norlatiadek made an appeal to the Faithful of Days of Edentia. The latter communicated the situation to Immanuel. It was near the time at which Immanuel was going to contact Mikael that the Father of Norlatiadek diffused the alarming news : Urantia had just reached the third degree of qualitative vibratory degradation (Year 1649 U.T.).

Mikael was warned that the humanity of this planet, where he had made his material effusion and of which he had the title of Planetary Prince, was heading towards active cosmic disintegration. He decided to go there himself. On the spot, he summoned all the cosmic Masters attached to Urantia and sojourning there. Their activity was very intense, but the global qualitative vibratory level irradiated by the Urantian humanity was increasing its degression.

We come now to the year 1870 U.T., date of the special meeting organized by Mikael on Salvington. He revealed to us that he had taken the decision to convene us specially, because he had just officially recognized Urantia as a planet at the fourth degree of qualitative vibratory degradation. Thus, at the scale of the local universe, Urantia is mentioned (1870 U.T.) in the records of Nebadon as a planet among those who not only belonged to the local system of which the sovereign had created a rebellion, but was also one of the planets of which the Planetary Prince had entered into the rebellion, and of which the Adam and Eve had failed in their mission. In addition, Urantia is registered as the planet having the highest rate of qualitative vibratory degression in Satania (since 1913 U.T.); And at last in 1977, among the 619 planets of Satania, Urantia is the 617th concerning the quality of the global vibratory level irradiated by its humanity.

Therefore Mikael Dominated me deputy-manager Planetary Prince and announced it to me during this meeting, but he also informed me of this : His Urantia plan is intended to establish a maximum limit to the new planetary risks and the bad influences which Urantia spreads in its local system. Mikael can no longer accept and witness another cosmic catastrophe in the system of Satania because the latter already represents in Nebadon the sick member in a worsening state. In fact, among the 37 planets disturbed by the rebellion, 6 humanities emit a progressing global vibratory level, 45 are more or less in vibratory stagnation, and 16 are in vibratory degression. Presently, in the year 1977 U.T., among these 16 planets, 3 including Urantia are in a critical vibratory situation and are launched in the reverse account leading to active cosmic disintegration.

At the time of the meeting on Salvington, Mikael called Immanuel. The latter then sent an official communication to the "Ancients of Days" submitting to them the records of Urantia of Nebadon classified at the 4th degree of vibratory degradation. A communication of this kind is extremely unusual in Orvonton, because appealing to the Ancients of Days in order to submit to them a planetary record means asking to them to decide the reverse account of time representing the delay, namely the period of time which will still be allowed to a humanity for starting off again at last on the right way of cosmic integration, failing what it will be disintegrated. This happens very seldom, because a humanity must have sunken very low. Nevertheless 3 planets of Satania are in this case.

At the time of this meeting on Salvington, Mikael left for Uversa in order to talk with the "Ancients of Days". He came back with the following information: The "Ancients of Days" of Orvonton have decided about Urantia of Nebadon that the ultimate period of delay for the personal cosmic existence of its humanity will be extended, but definitively set at 287 cycles (I) beginning at the coming of Mikael for his effusion on Urantia, namely August 21 year 2002 U.T. Accordingly, Mikael announced us that the final planetary plan for Urantia was launched. A plan like this one implies always the coming of a Cosmic Master materialized on the planet. Since I was Deputy Planetary Prince of this planet, it was me whom Mikael appointed to materialize myself on Urantia and to accomplish a multiple mission of emergency intended to give the ultimate chance to the Urantians by the formal acceptance of the Planetary Cosmocracy. This would combine all the conditions allowing the Urantian humanity to start again on the way of qualitative ascension and overstep again the minimum level under which it would undergo active cosmic desintegration in 2002 U.T.

During this meeting on Salvington, my Father Melkizedek warned me that because of the vibratory level of the Urantian humanity and of its daily rate of degression, my activities during my 4 cycle materialization on Urantia will be quite different from those I had during my first coming on

(I) 287 cycles of 7 years = 2009 years since 7 B.C.

this planet. They will also not be comparable with those of the other cosmic Masters who came before Jesus. My Father Melkizedek warned me also that my mission and its Perfect execution would be extremely difficult considering the place and time at which it would be performed : indeed, among the cosmic Masters in relation with Urantia, I am the one who is commissioned when it is plunged into the worst vibratory level. Because of the cosmic laws, this implies that the risk of deviation from the path is the strongest, and still increased by my state as a material human with the same status than every Urantian.

My Father Melkizedek advised me that my multiple mission was the cosmic plan, but that because of the data, it was foreseen that it would probably be only partially realized. Moreover, this is presently verified (1918, fifth degree, 1945 sixth degree) by the difficulties which never reached the same intensity on Urantia and whose multiplication check or even nearly asphyxiate the divulgation of the way to your humanity. Hostility and even aggressiveness are behaviours more and more used by the individuals who are too deviated to be even able to open themselves to others, and still less to somebody from whom they feel different, living otherwise than them, speaking from something else than their professional speciality, and momentarily upsetting the narrow concept which they had built up or received about life, the way to lead it, and the cosmic realities. My Father Melkizedek confirmed me that, in conformity with the law applied elsewhere in the cosmos, Mikael will certainly not judge me on the results obtained during these 28 years of my material presence on Urantia, but^I will be judged on my faith, my sincerity, my true and deep will to help those who can receive the path and wish to undertake the personal qualitative ascension, and my entire and pure consecration to try to fulfil as perfectly as possible the multiple mission which is mine.

Since this cosmic meeting, on Salvington, two most important events happened : In 1918 U.T. the Urantian humanity reached the 5th degree of disintegration, and in 1945 the 6th. About this subject, a cosmic law states that when a material humanity reaches the 6th degree, the correspondant vibrations that it irradiates have a very powerful action on the matter composing the planet that it occupies, and that

the corresponding interaction then instigates serious physical upheavals involving vast destructions who may extend to the almost complete annihilation of this humanity, the latter being imminent when the 7th degree is reached. As a result of the cosmic vibratory law of the return, and of the global vibratory level emitted by the Urantian humanity, the consequences perceptible to the human beings will be the following :

From 1976 U.T. until 2002, multiplication of the volcanic and tectonic seisms, tidal-waves, hurricanes, floodings lowering by up to 20 degrees of the present temperatures in the rather cold regions, increasing the temperature by up to 20 degrees in the rather warm regions. From 1981 onwards, progress of the levels of the seas which may reach up to 200 meters in 2002 U.T. due to continental collapses. From 1988 onwards, toxic air unbreathable below the altitude of 300 meters. From 1976 and until 2002, multiplication of civil, national, international and interracial wars... A cosmic law states that the vibrations emitted by a human being are influent on the levels below the human (animal, vegetal, and mineral) in keeping with the difference existing between the potential of the maximum vibratory level and the actual level of the human being. This difference creates a tension (total lack of the state of identification) and this involves on the material surroundings an increased influence of which the quality equals that of the emitted vibrations. The greater this difference, the more powerful is this influence. Now, because of the major event which will happen 287 cycles after the material birth of Jesus (August 21, 2002) according to the cosmic probabilities of Urantia, less than 1/1.000 of the Urantians will have a great influence with a high personal vibratory level, and more than 999/1.000 will have a very low personal vibratory level, but their influence will be nearly worthless. Everything will be explained to you when we shall meet. The material consequence of this happening in 2002 will be that, quickly after that date, all the physical perturbation and destructions of all kinds which I have shortly described will cease. Then will begin a new era for the humanity of the planet Urantia, that of qualitative betterment and increased spirituality towards the divine Creator of the cosmos.

Since the month of July 1976, due to certain causes and for a certain aim, I have frequent contacts with my Father Melkizedek by cosmic language. Since I began to draft "The Records of the Humanity of the Planet Urantia" I am constantly informed by communications of all the figures in all the fields concerning Urantia, and of their evolution. For example I can tell you immediately that on September 1, 1977 the population of Urantia comprised 4.160.646.348 human beings among which 3.299.392 (790 per million) were ascenders on the way of cosmic integration. Nevertheless, only about 30 per million decide every day to follow the path. Sure enough, it implies that the planetary percentage of ascenders diminishes little by little. I will be able to acquaint you with the data of Urantia as soon as we meet.

Jacques Weiss, I do not think either that you have yet received communications concerning the planetary plan for 1978 and of the following events until 2002, so I will briefly inform you on certain points.

First, on January 1, 1978, I will be deseptuplated by an exceptional operation. Thus I shall be materially present on Urantia in seven places (Bebekantias) at the same time and under the same appearance in addition to my original "I" which is in Spain. This has been communicated to me by my Father Melkizedek. Indeed the plan of Mikael (Urantia 1960-1995) concerning my sojourn on your planet during that period foresees the creation on January 1, 1978 (under my responsibility) of I4 centers of ascension (7 Urankantias + 7 Bebekantias). Nevertheless, because of the situation (and having the power to do it) I have decided to create 7 bebekantias and only 6 urankantias, plus the Kosmikatia, planetary headquarters which I occupy with Kosmika and Tonapa.

The places of the seven bebekantias are 1. In Canada (near Thunder Bay). 2. In Mexico (near Camargo). 3. In Brazil (near Brasilia). 4. In Switzerland (near Neuchatel). 5. In Israel (near Tiberias). 6. In India (near Mac Cleod Ganj). 7. In Australia (near Alice Springs).

The places of the seven Urankantias are 1. Sweden (around Jonkoping). 2. Tunisia (around Tataouine). 3. Romania (around Babadag). 4. In Great Britain (Wales). 5. In Sardinia. 6. In France (near Lacaune) + One Kosmikatia in Spain (Province of Cuenca).

My period of desevenfoldment will last from January I, 1978 until January I, 1988. The day of August 21, 1988 will mark the beginning of the 286th cycle at the end of which Mikael will come to Urantia and mark the end of my mission in a material body. "Bebekatia " in cosmic language is the designation of the 7 centers of ascension specially created in 1978, each consisting in 5 couples of ascenders whose action will be definite and cardinal, because they will be the base of the new Urantian humanity on and after the year 2002. In these centers, each couple will create a child between 1978 and 1981, and a second one between 1981 and 1988. Between 1995 and 1996, the primary "Bebekas " (those born between 1978 and 1981) will "marry" between them, and the group of ascenders of the new humanity will expand. They will create in 1996 the "Tertiary Bebekas".

"Urankatia " in cosmic language means Urantia center of spiritual ascension. In the 6 urankatias which will be created, you will find ascenders (not-coupled) of which the number will be limited only to 70 per village-center. From January I, 1988 onwards, as a substitute of my material presence, the 7 bebekatias will be guided by my supervision "in spirit". They will be under the guidance of the most united couple (nearing the state of identification) and the highest of the five composing the spiritual center. This couple will then remain "at will " in contact with me, residing in the Kosmikatia, by communication in cosmic language. I will furnish you the other information on this subject when we shall meet.

At the beginning of the 286th cycle (I); I shall again be undoubled, "ME-I " remaining on Urantia, and "ME-2 " going on Uvantia (2) in order to pursue my mission. At the time of the meeting on Salvington, Mikael had told me that during the period 1967-1995 U.T. I would have to go several times on Uvantia, a planet classified as " evolutionary modified". My undoubling will last 4 months and finish on January I, 1989. Mikael informed me that I must carry on there the mission which had been mine when ~~the~~ I went on Uvantia in the year-7 U.T., while he incarnated himself in effusion on Urantia. In addition, I will have there a very definite task to fulfil.

(1) 1988

(2) Venus

Mikael told me " On the one hand you will do all that is in your power to remind the humanity living on Uvantia of what are the cosmic reality and the cosmic laws, and caution them against any deviation from the way of cosmic integration, because it would render their existence very frail and would end by actively disintegrating them. Remind them the primacy of the qualitative elevation in the level of the "materitia ", and then, through the cosmic levels of realities, the attraction and interest of the material scientific researches while living on this cosmic level.

When I returned from my mission on Uvantia, he named me officially " Minister of Mikael " of " Christ of Uvantia ". At the time of the meeting on Salvington, Mikael told me that I should advise the ascending Uvantians of a mission consisting to care that their non-ascending co-planetarians use correctly their scientific knowledge and that they should not interfere in the life of the Urantians. The ascenders should influence them and explain to them what is really going to happen on Urantia in 2002. They should bring the non-ascenders to admit that this is necessary and that the Urantians are the sole responsables of it. During my visits on Uvantia, I should explain clearly to them that all the Urantians who deserve the cosmic death in 2002 will suffer it wherever they will be at that time. Any action by the Uvantia managers, such as their plan of intervention which they are contemplating, could only bring about ill-fated consequences for them, and would be wholly ineffective. Their plan of intervention on Urantia implies to act in the year 1996 U.T. and foresees to embark about 2000 Urantians on space-vessels heading towards Uvantia where these Urantians would dwell. Uvantians and Urantians would unite and create generations more evolved biologically in order to be better prepared for the life in the cosmos. The other motive for this kidnapping is that the Uvantians know that a grievous event will happen to this Urantian humanity. Their plan is thus intended to "save" 2000 of them by making them leave their planet in 1996, namely a few years before the "event" which the scientific part of their humanity neither recognizes nor understands.

I must stop here these written informations that I send to you. You have presently your personal reactions. My wish is

that we should meet, but this meeting will only be realized as a sequel of what you will write me or not in your letter that I suggest you to send at the address below, wherefrom it will be forwarded to me.

Signed : MAKIVENTA MELKIZEDEK, responsible and cosmic supervisor of the planet Urantia where ~~he is~~ presently materialized. Here.
and
