MUFON Continental Co-ordinator for Africa, P.O. Box MP 49, Mount Pleasant, Harare, Zimbabwe

I. METEORITE SHOWER (?) OVER ZIMBABWE, SEPTEMBER 14, 1994

You may already have heard of the UFO activity in Zimbabwe these past few days. I have tried to let everyone concerned know, but the cost of international telephone calls from here is exorbitant and I do not have a Fax set-up yet.

It started on Wednesday night, the 14th September 1994 at approximately 20:50 hours to 21:10, give or take some minutes either side. Hundreds of people from all over Zimbabwe reported a series of bright lights moving across the sky. Prof. Euan Nisbet, visiting from Britain, immediately identified this as 'a spectacular meteorite shower' and as a lot of the reports sounded like meteorites, I accepted what he had to say. But after receiving about 50 reports, I began to realise that those who saw the light over man-made Lake Kariba, said it was in level flight and when it reached some hills at the side of the Lake, it rose up to avoid them and then changed direction. As I am Continental Co-ordinator for Africa to MUFON (Mutual UFO Network, the largest UFO organization in the world, operating under the Directorship of Walt Andrus, from Seguin, Texas) I receive the MUFON Journal on a monthly basis and this contains a report in each issue giving meteorite showers due to appear in the month following publication. There was no mention of any meteor shower during the month of September!

The second speculation as to what this could have been came from one of the South African newspapers and a British paper: they said it was one of the stages of a Russian satellite which went into orbit on the 27th August of this year. This it might well have been although I don't understand the discrepancy of 18 days from lift-off to the jettisoning of whatever it was, but I have had several reports which described a nose cone with three bright lights on it; one in front and two behind, and several streamers of light coming out from behind. So this would be a much more likely identification. Many reported a series of smaller lights either a) surrounding the craft or b) following behind in formation. These smaller bodies numbered anything from 9 - 14 depending from which angle they were viewed.

Nearly all the reports said there was no sound, with two exceptions: one reported a quiet vibration, and the other I will refer to later on.

The light was a brilliant white, tingeing to an orangey-red behind. Some said it was 'huge'; others that it was the size of a Boeing Jumbo 747 flying at its normal speed (approx. 625 mph) and that it appeared to be on fire and ready to crash. But then the object levelled

out and flew in a straight line at 'tree-top level'. Those on Lake Kariba (about 100 witnesses) said that when it reached the hills at the side of the lake, it rose to avoid them and changed direction.

Reports from Radio 702 (a commercial radio operating from Johannesburg) stated that the lights were seen above Kempton Park (near to the main Jan Smuts Airport). They then appeared to move over Botswana and overlapping the borders of Zambia; back into Zimbabwe, over Lake Kariba (around 21:00) to Bulawayo and on to Harare (21:05) passing over many rural areas. Lastly, it reached the Mutare area and over the hills into Mozambique when it seemed to fade from view. I have had no reports from Mozambique or Botswana.

Some people reported that they thought they were meteorites, but most were doubtful of this. Reports came from farm labourers to pilots, MD of a large local company, technologists and many fishermen and visiting tourists on Lake Kariba. Most people were puzzled and some said they had seen meteorites often, but nothing like this. One group of workers thought it was Jerry Rawlings, the President of Ghana (who was flying into Zimbabwe on that day) and that all the pyrotechnics were sent out of the plane to impress the people who lived here!

The reported height varied greatly but most referred to 'tree-top' level. Some reported a height of 2-3000 ft. (one a pilot report). Some mentioned 2-300 ft. and these came from different parts of the country.

At 21.04 I heard an explosion from my study in central Harare, and some workers in Fort Rixon, near Bulawayo, heard 5 explosions. Prof. Nisbet said these were the meteorites passing through the sound barrier.

Two people viewed the object from directly underneath and said that it had a flat belly and that it was metallic looking, moving on a straight course. One technician said he could see two engines in front and felt it was a machine of some kind. All objects were seen below scattered cloud level. Apart from this, the night was clear.

Two mothers reported that their children were affected: a 3-year-old child in Beatrice (40 km from Harare) woke and shouted for her mother when the lights went over, saying there was a lion inside or outside her room. She subsequently drew what she saw but I have not yet seen the drawing. An 18-month-old baby woke and could not be settled. She is normally a very quiet and contented child but kept the family awake all night with her distress.

This is merely an overview of the many reports received and I am still looking into them for more details, but I wanted to report on what is going on in Zimbabwe so those of you involved with UFOs have some idea of the situation.

II. LANDED UFO, WITH OCCUPANT, AT RUWA (ZIMBABWE)

On Friday 16th September 1994, at approximately 10.15, 62 children from Ariel School, a private primary school in Ruwa (about 20 Km from Harare), were in their playing field for the mid-morning break.

Suddenly, they saw three silver balls in the sky over the school. These disappeared with a flash of light and then re-appeared elsewhere. This happened three times and then they started to move down towards the school with one of them landing (or hovering) over a section of rough ground made up of trees, thorn bushes, and some brown-grey cut grass with bamboo shoots sticking up out of the ground. The children are not allowed in this area although it is adjacent to their playing field and is not fenced off, because of snakes, spiders and perhaps other harmful creatures. One can soon disappear from view while walking here, and there is only one very rough track used by tractors in an attempt to clear this area.

There is a line of electricity pylons and according to one boy, the object followed along this line prior to landing. There is also some controversy as to whether the object landed on the ground or hovered above it. On Tuesday, 20th September, I went out to the school with a BBC reporter and his television equipment, as well as my son and Gunter Hofer, a young man who builds his own electrical equipment, viz a Geiger counter, a metal detector and a magnetometer, to try and see if the object left any traces behind.

The headmaster of the school is Mr. Mackie, who was most co-operative, and although he had never been involved with UFOs or a believer in them, said that he believed that the children had seen what they said they saw.

I was able to interview about 10 or 12 of the older children and this was recorded for BBC television. The reports were similar although some children were more observant than others. The consensus of opinion was that an object came down in the area they indicated, about 100 metres from where they were at the edge of the school playing fields. Then a small man (approx 1 metre in height) appeared on top of the object. He walked a little way across the rough ground, became aware of the children and disappeared. He, or someone very like him, then re-appeared back at the object. The object took off very rapidly and disappeared. The little man was dressed in a tight-fitting black suit which was 'shiny' according to one observant girl (11). He had a long scrawny neck and huge eyes like rugby balls. He had a pale face with long black hair coming below his shoulders.

I had suggested to Mr. Mackie prior to visiting the school and before the children had been interviewed, that he let the children draw what they had seen and he now has about 30 - 40 drawings, some of which are very explicit and clear, although others are rather vague. The

children's ages vary from 5/6 to 12 years. I have 22 photocopies of the clearer drawings as Mr. Mackie kindly allowed me to page through the pictures and choose those I wanted. Most of the descriptions are similar but some of the craft are very obviously 'flying saucers' and I wonder how many of these children have had access to the media. Others are crude but more or less in this saucer shape.

The children vary in cultures: there are black, white, coloured and Asian children. One little girl said to me, 'I swear by every hair on my head and the whole Bible that I am telling the truth.' I could see the pleasure on her face when I told her that I believed her.

The smaller children from 5-7 years were very frightened at the time and ran shouting, 'Help me, help me.' When the older children asked why they were saying this, the reply was, 'He is coming to eat us.' I should think this applied more to the black African children who have legends of *tokoloshies* eating children.

The teachers were in a meeting and did not come out. When I queried the headmaster about this he said that the children always shouted and yelled during their playtime and no-one thought there was anything unusual going on. The only other adult available at the time was one of the mothers who was running the tuckshop. When the children came to call her, she did not believe them and would not come out: she was not prepared to leave the shop with all the food and money.

Gunter and the men thoroughly examined the ground around where the children had seen the object, but could get no reaction on the geiger counter or on any other equipment. If the object was hovering perhaps nothing would show. I walked, on my own, along the electricity pylons for quite a way, caught up in thorn bushes, tramping blithely over snake holes and discarding all caution. I found no place where some object could have landed and pressed down the foliage. In fact, I should think the bamboo stumps would have been a deterrent. The day was hot, around 33 degrees C, and I had a long walk through waist-high brush. When I reached home again at about 12:50, I had a headache, my feet ached and I felt disorientated. If you don't hear from me soon, you will know that I did cross the landing site and am probably suffering from a mild dose of radiation! ■

problems. The three witnesses, Signora Lo Bello, Signora Lina Magri, and the architect, Signor Cassia, all of whom had *admitted* to having seen the little fellow at 9.00 a.m. on Sunday, complained bitterly about the resultant "loss of tranquility" and "loss of privacy". But it was scarcely the fault of the press if, out of all the many eyewitnesses, only these three had spoken up! In any case, there have also been other reports! At Ascoli Piceno, a few weeks ago, yet another tiny being, only about 70 cms in height, was seen. The story led to much rumpus and heated debate as usual between those who were "*pro*" and those who were "*con*" ■

MY FIRST UFO PHOTOGRAPHS!

© By PAUL DONG (China and California),

FRS Consultant and Special Correspondent on Ufology in China.

Many years ago, the U.S. publication *The National Enquirer* announced that they would give a \$50,000 prize to anyone who took a "satisfactory" UFO photo, but so far nobody has won that prize.

"Satisfactory" is a nice vague term. It might mean a picture of a huge flying saucer hovering before the photographer's face, its rows of windows flashing with strange lights, and an unopened door and something like a movie screen rapidly displaying rows of extra-terrestrial writing. Or it could refer to a small flying object shooting out electric flashes on all sides and landing on the White House lawn, with a spaceman and a spacewoman with oversized heads and clad in space-suits coming out from the door through a shower of electrical sparks and waving to the photographer.

With these strict requirements of course nobody will ever win the prize. In other words it simply means that those who announced the prize were only playing a game, and won't ever let anyone win.

But if they would only lower their standards a little, maybe then the set of four UFO photos that I managed to get here at Oakland, California, in September 1994 could qualify for the prize. (And, even if I can't win the prize, at least it will contribute to the continuing debate among the *National Enquirer's* staff!)

I have seen many UFO photos in my time, including those sent from all over the world to the editorial department of the Chinese bimonthly *Journal of UFO Research*; those published in various international UFO magazines; plus over 2,000 others shown to me by UFO photo collectors, and I feel that the most satisfactory of all so far is this UFO that I have just photographed for the first time in my life. When it is published, some folk will of course attack it and say it was simply the lights of a helicopter or the reflection from a balloon, or a "blimp", or the Planet Venus, or a lunar halo, or "swamp gas", or so on....

No matter what they say, I shall just go on laughing at them. I shall remember how I gasped in amazement as I saw the strange object appear in the night sky. It showed up bright and clear, and was flying slowly, so that I was able to get a fine view of it. Then, soon after I had taken the photos, it suddenly vanished. But it had been a sight that I will never forget. So, dear Friends, please don't try to tell me that this was only some flying insect!

I hold the copyright on this set of four photographs. Any FSR readers wishing to have prints of the four pictures should please send £10. or US \$15.00 (in-

cludes air mail postage) to me at the following address:-

Paul Dong, P.O. Box 2011, Oakland, CA 94604, U.S.A.

Details of Paul Dong's U.F.O. Photos

Date sighted: September 30, 1994, 12.15 am

Place: Oakland, California, U.S.A.

Altitude and Speed: Same as airplane flying over the city at night

Sky: Dark and clear, no stars or moon

Object: Looks like small football with lights, no sound

Film: Kodak 100, color

Camera: Canon, 50mm lens

Witnesses: Paul Dong, wife and son (age 10)

Photographer: Paul Dong (age 66)

Experience: First time took UFO photo in life

Editor's background: Editor of Mainland China's *Journal of UFO Research* (in Chinese, overseas circulation 320,000) for ten years

Consultant for The Flying Saucer Review, England,

Co-author of Timothy Good's yearly International UFO Reports ■

Author of:-

THE FOUR MAJOR MYSTERIES OF MAINLAND CHINA, Prentice-Hall, Inc, USA, 1984.

CHI GONG: THE ANCIENT CHINESE WAY TO HEALTH, Paragon House, USA, 1990.

UFOs OVER MODERN CHINA, privately published by UFO Photo Archives, USA, 1983.

飛碟百問百答

(QUESTIONS AND ANSWERS ON UFOs). In Chinese only.

DELI SHUJU, Hongkong, 1983. English Translation by Gordon Creighton in FSR 29/6 (August 1984).

Articles by Paul Dong have also been published in OMNI Magazine (USA), ESOTERA (Germany), UFO AND SPACE (Japan), RENMIN RIBAO (People's Daily, Mainland China's leading newspaper, with circulation of 12,000,000), SPACE FLIGHT, ASTROLOGY, and FEIDIE TANSUO, (THE CHINESE JOURNAL OF UFO RESEARCH). ■
