

a dog-type animal, and to the inhabited surface of Venus. Years later, he was proved wrong by probes sent from earth and was consequently derided and accused of hoaxing. I remember how disillusioned I was at the time and even sold my autographed copy of *Flying Saucers Have Landed* when I needed funds. Years later, how I regretted my disloyalty as I realised that it was Adamski himself who had been hoaxed by the aliens and I had disposed of a treasured possession, although I still have a photograph taken during his lecture. I presume that once again, the reason for this odd behaviour is to direct attention from their hidden agenda by pouring ridicule upon the whole subject of Ufology and thereby discouraging any serious investigation.

There is one further point to consider. It is accepted that Homo Sapiens suddenly appeared, in geological time that is, consequently, if the aliens had not genetically modified us, we would still be little more than apes, and

if we had been left to evolve naturally, we would have required far longer, probably many eons to reach our present level of evolution. Is this a good thing? We may have made a better job of it had we taken it more slowly but of course, we are not to blame for our violent and bloody history and our warlike propensity still in evidence today because, as I trust I have ably demonstrated, it was the aliens who programmed us for their own ends. Without us they cannot survive, but I reckon we can well survive without them.

So what happens next? More of the same I would say, unless humanity as a whole wises up to the situation, which isn't very likely. I trust that fellow Ufologists will take note of my diatribe and take it on board so that, at least, I shall know that when I am dead and gone my ideas will not have died with me but may one day help towards liberating the human race from its servitude. ■

BLOND ALIENS IN THE YUNQUE! © BY JORGE MARTÍN, Editor of *EVIDENCIA OVNI* (Puerto Rico) and FSR Consultant.

Translation from Spanish. G.C. (*EVIDENCIA OVNI* No. 16, 1997)

Although in previous issues we have frequently given reports of encounters with "small Greys" or other smallish and "non-humanlike" species of beings in the Yunque National Forest in North-Eastern Puerto Rico, it is a fact, even if less well known, that there have also been quite numerous cases there of encounters with seemingly very *human* types of beings, often presenting truly remarkable psychic faculties and mystical features, and tall and fair in build. Here I will give a few of them:-

I. The case of Pedro Suárez (pseudonym).

On September 27, 1991, this gentleman, an electronics engineer specializing in robotics and artificial intelligence, residing in one of the western cities of our Island, told us about an experience he had had in the Yunque Forest during the 1970s, when he was a boy, and gave us his permission to publish it, so long as his name was not revealed.

It had all begun when his parents heard talk of an "Esoteric Centre" known as the Fundación Rossi (Rossi Foundation) in the nearby town of San Sebastián and they began attending weekend gatherings there and met a man name Carlos Ochoa who maintained that he was a "contactee" with extraterrestrial beings and told them a lot about these experiences. The boy "Pedro Suárez" became a fervent admirer of Ochoa (though others thought Ochoa was mad).

One day then, "Don Carlos" invited the Ochoa family to come and spend a week with him in the house of his (Ochoa's) sister in the Yunque Forest. He says he no longer recalls the exact date, but it was around the time when the "Skylab" module was being seen at night in orbit.

And one night, while they were all there in the sister's

Fig. 1. Our indigenous ancestors said that in the Yunque there lived the "gods."

house, Don Carlos stepped out into the Forest and the boy, enthusiastic and curious, followed him.

They came to a spot where there were no trees. Overhead was a cloudless sky full of stars. Suddenly the boy realized that he was alone, as Ochoa had gone on ahead and was out of sight, so the boy decided to stay where he was and wait, for Ochoa would assuredly turn

Fig. 2. The Yunque forest, a place very well known for the high incidence of unusual events, such as encounters with UFOs and strange beings, has also been the stage for encounters with blond aliens.

round and come back. Then, about five or ten minutes later, the boy heard footsteps and found himself confronted by a tall man about 7ft tall, with long fair hair - *almost white hair* - right down to his shoulders, and very white skin, in other words, very much like what we call an "*albino*". (The moon was full, so the boy saw him clearly).

The man was dressed in a silvery colour one-piece overall, like a "wet-suit", with long legs and sleeves, and with his hands exposed. And this tall being halted about 10 ft from him. Pedro tried to run away, but was unable to move, feeling as he described it to me, "as though standing on one leg that had gone to sleep, and with a tingling feeling throughout the entire body".

Suddenly the "*albino*" raised one hand and pointed it at him, with the palm towards him. At once the tingling sensation that was holding him stationary vanished, and the boy at once turned round and fled, feeling totally disorientated and yet still with the sensation of being watched. Once inside the door of the house, the boy looked

Fig. 3. The mysterious "balls of light" seen by so many people in the Yunque could be luminous manifestations of the alien beings

Las misteriosas "bolas de luz" vistas por tantas personas en el bosque de El Yunque podrían ser manifestaciones luminicas de los propios seres alienígenas.

back and again he was overwhelmed with the sensation of still being observed.

Shivering with fear he dashed up the stairs and burst into the room where his parents and Ochoa's sister were sitting and told them what he had seen. His father dismissed his story as "imagined", but Don Carlos Ochoa's sister said: "*Carlos doesn't like being followed unless he has given his*

consent! So don't tell him you followed him, or he will be very angry!"

At that moment, Don Carlos came back into the room and sat down. That was the last week-end at which they ever saw "Don Carlos"

Not long afterwards Pedro's father was washing a boat in front of the house where he lived, at Mayaguez, when suddenly, looking up, he spotted an immense UFO approaching, and he called to his wife and his son Pedro to come out and see it.

Pedro says it was simply gigantic, and beautiful, and it remained in sight there for about 5 minutes and was observed by many other people.

II. The Case of José De Diego Vázquez.

"You are never going to forget this!"

"Something that was coming out of him - a strange sort of light - lit up everything around, very clearly.... And he said to me: 'Don't cry, I'm not going to hurt you. I come in peace.'"

"His voice was clear and gentle, and then he bent down and wrote some symbols in the soil...."

In this case the young man, José De Diego Vázquez, a resident of Rio Piedras, had an interesting encounter with a mysterious blond being in the Yunque Forest in the summer of 1988. Here are the details, as he gave them to us:

"It was one summer night in the Yunque while I was on a camping and survival course along with other lads.

"It was about 3.00 am and I was out in the forest, walking down a descending path when I spotted a cluster of small lights about 60 ft or so from where I was.

"They were moving and flying about in a group, at a low altitude, and forming a ball or mass of light, and seemed to be coming nearer. I was scared and

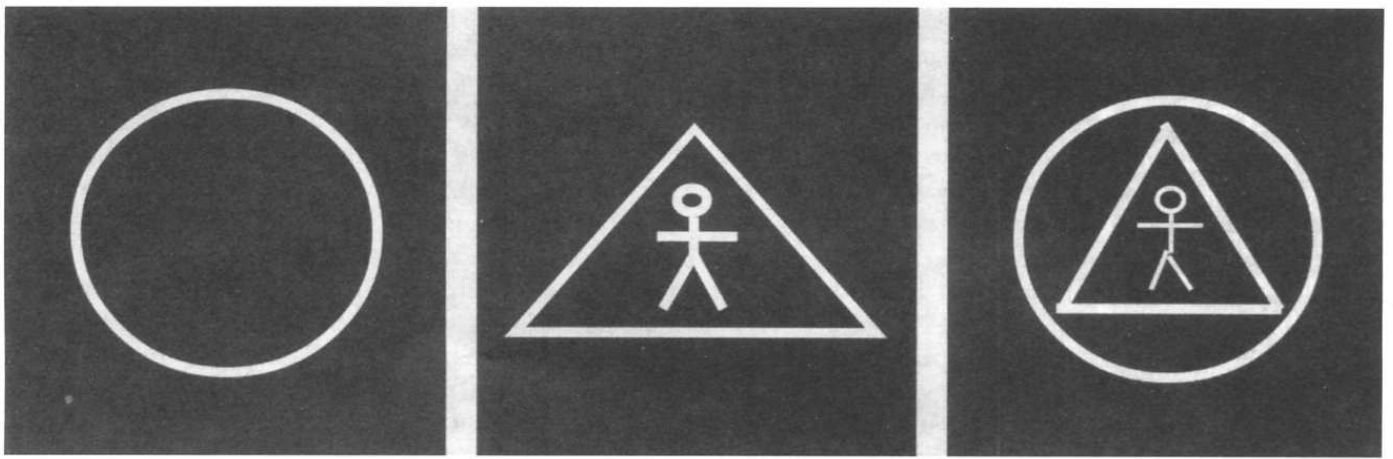

Fig 4. The three symbolic drawings made by the tall blond being on the ground in front of the witness.

I started to cry, so great was my shock.

"Then suddenly the ball of little lights changed course and went behind a big rock, and I swear to you, what I saw next was *unbelievable!* There seemed to be a sort of glow coming up from behind the rock, and then out stepped a tall man, about 6ft 2 inches or so in height - very tall, blond, with long, very white hair, rosy-pink complexion, and dressed in a white sort of robe.

"And - I don't know how - but this man made it impossible for me to move from where I was. He came right up to about 20 ft from me, and something that was coming out of him lit up everything around, ever so brightly, and I was so scared I started to cry, and he said to me: *"Don't cry. I'm not going to hurt you. I come in peace"*

"His voice was clear and gentle and then he bent down and sketched some symbols in the soil and said: *"You are never going to forget this!"*

The first of the symbols was a circle, and so far as I

could understand it I took it to represent our planet the Earth. Then he made something like a triangle with the figure of a man inside it, signifying maybe one of their craft, they being extraterrestrials. And then he did another symbol, with the man and the triangle inside the circle giving me to understand that the Earth was going to encounter other intelligent beings from Outer Space, - *that they are already here.*

"I stopped crying and controlled myself a bit, and then I asked him what his name was, and he gazed at me fixedly and simply gestured to me with the open hand... and I saw that on his hand he had another sort of symbol that I can't describe very well."

At that moment, according to this witness, the tall being performed a half-turn and disappeared from view behind the rock again.

And suddenly the all-pervading lights vanished, and all was dark once more. And, looking at his watch, to see whether it was time for him to go onto camp guard duty, he saw it was still 3.00 am - the time when he had arrived at the spot. It was as though there had been no lapse of

time at all! He said: "It was astounding, I couldn't believe it! And I took to my heels and fled, leaving all my stuff on the ground there. And when I reached the road and asked one of the Yunque Forest Guards who came by in a jeep making his rounds, he gave me the time and it was the same as I had - 3.00 am!"

III. Similar Encounters in Other Parts of the Island.

One of these occurred to a fisherman named Inocencio Cataquet from Aguadilla, on a beach known as Peña Blanca (N.W. area of the Island).

It was in the summer

Fig 5. Two of the types of blond beings seen in the Yunque.

of 1988, when, during a dive, Inocencio Cataquet encountered a "flying saucer" type of craft standing on the sea-bed.

This machine had a colouring very close to the colour of the sand on the Brazilian beeches (camouflaged?) and near it, also standing on the sea-bed, was another object which was rectangular and black. From this black "box-like" object came something that looked like a crystalline or translucent 'cable' which lay in an irregular fashion in the water, from which Cataquet could conclude that it was something *malleable*.

Suddenly he saw this 'cable' disappear, withdrawn into the 'box', and simultaneously the UFO began to emit a loud hum and Cataquet decided to move well away from it and go up to the surface. A few minutes later he saw a circular craft rise out of the sea and depart.

Shortly after that he had his encounters with the beings, also in the same area of the shore.

They were tall individuals with pink-rosy complexions, long fair hair, blue eyes, and clad in shining white robes and golden sandals. By means of telepathic symbols they imparted to him certain details about the geological changes that would soon occur on Planet Earth.

[For more details see my translation of Jorge Martín's earlier report on this same case, *The Blonds*, in *[Evidencia OVNI No]*]

Precisely as in the case of the young man José De Diego Vázquez (Case II above) these blond beings had first appeared to the witness as glowing spheres consisting of an infinite number of brilliantly shining particles of light which, in a luminous flash, turned into the enigmatic human-looking personages.

During one of his encounters with them, they had taken him on board one of their wonderful underwater craft, "shaped like a fish, like a dolphin, driven by a technology totally based

on the energy from *water*"

These beings told Cataquet that they were in no way connected with those other beings who are doing bad things, and that they were watching those "others" though without specifying precisely who "those others" are. [In the other article, Jorge Martín has said that Cataquet mentioned specifically that these "baddies" were "Rigelians", [from the massive star RIGEL.G.C.]

They informed him that they travelled interdimensionally, via dimensional portals that opened up by means of magnetic devices, and they informed him moreover that their species were engaged in a thorough going and detailed study of all the species of marine life here on Planet Earth.

They said that other kinds of beings were also engaged in doing the same thing but on different sorts of species and on different kingdoms of life, because the geological changes due to occur soon on the face of the Earth will gravely affect, and will endanger, every species of life in our world. The study they are conducting and their genetic collections of all the species of life including Man - on this Planet will represent a genetic reserve by means of which, if necessary, they will be able to re-populate the Earth after the period of destruction.

On the other hand, as regards the balls of brilliant light that are allegedly being seen in the Yunque and that are said to be connected with these alien beings, it seems that the balls of light are frequently seen in areas reported to be "accursed", where numerous strange phenomena occur. And the local population has a certain sort of superstitious fear of such places - *in other words maybe of areas where interdimensional windows or portals exist*".

[This angle is analyzed in another article which we give further on in this same issue. Jorge Martín.] ■

"WINDOWS" TO OTHER WORLDS: THE KEY TO THE UFO ENIGMA?

© BY JORGE MARTÍN, Editor of EVIDENCIA OVNI (Puerto Rico) and FSR Consultant.

(Translation from Spanish. G.C.) EVIDENCIA OVNI No. 16 (1998)

Are there perchance "windows" or "doors" to other and unknown dimensions, to parallel worlds, to other planes of Time-Space? Can this perhaps be the answer to the mysterious disappearances that from time to time occur in certain specific and determined geographical areas of the world? And the answer also to some of the manifestations of the UFO Phenomenon?

I. THE STRANGE CASE OF DAVID LANG (1880).

Every year many people disappear in a mysterious fashion. For a lot of these disappearances there can then appear - sooner or later - some sort of *explanation* - i.e. accidents, deaths, kidnappings, etc. etc. But a large number of human disappearances do indeed never find any satisfactory explanation.

In this article we will review a few cases of this kind that combine very peculiar features and that will provide us with a more complete over-view of the problem.

Here, for example, is the case of David Lang of Tennessee, U.S.A., family man, and owner of a prosperous farm. His strange disappearance took place before the

very eyes of his wife, his children, a cart-driver, and the local small-town judge who was just arriving on a visit at that precise moment. It was in broad daylight, on September 23, 1880. Lang went out to welcome the judge and then, after he had gone a few steps, precisely at a point half-way between the spot where his family were and the point where the judge was, farmer Lang suddenly vanished into thin air before the incredulous eyes of all those present.

At the spot where he had been standing when he vanished there was a layer of yellowish wilted grass that looked as though it had been withered and dried by great heat. In vain they searched the surroundings. David
